Ecommerce and Cross Border Taxation William L Richards Jr. S.J.D., 2015-01-21 Electronic commerce by its very innovative nature has engendered a novel application of past precedents. In the application of concepts of cross border taxation it embraces traditional questions of source and resident taxation. Initially these principles were developed domestically. What has transpired in the development has been an evolution of the Due Process and commerce clauses of the United States. This evolution of constitutional considerations resulted because electronic commerce made for a complex determination of which domestic state had jurisdiction to tax electronic commerce. It brushed up against precedent notions of how the Due Process and Commerce Clause had been analyzed in terms of activities sourced and effects upon those whose borders are crossed. Keywords: ECommerce Taxation Commerce Clause Due Process Trade or Business Permanent Establishment Treaty.

E-commerce and Source-based Income Taxation Dale Pinto, 2003 The advent of electronic commerce has caused many to question the continued viability of sourced based taxation. A Conceptual Framework for Analyzing Consumer Responses to Pricing Decisions Regarding the Online Distribution of Digital Content Lucian Morariu,2008-04 Diploma Thesis from the year 2007 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1 7 University of Mannheim Lehrstuhl f r Allgemeine BWL und Marketing I 338 entries in the bibliography language English abstract No other electronic medium in fact no other medium at all has become a mass medium as fast as the Internet did At the beginning of 2008 there were more than 1 3 Billion users online which accounts for roughly one fifth of the world population Historically the Internet has been conceptualized as a means of communication Realizing its potential however it was soon used for commercial purposes as well In addition to that there is a third major area that has long been a major pillar of Internet usage content Much of the tremendous growth of the Internet over the past decade can be explained by the fact that apart from fees for the usage of bandwidth content and other services on the Internet

have usually been offered for free typically financed by revenues from online advertising Faced with the burst of the Internet bubble and the sales from Internet advertising breaking away however online companies started looking for alternative ways of generating revenues One of the most obvious options was to start charging consumers directly for the content offered to them which was a rather significant paradigm shift The picture emerging today is twofold On the one hand online consumers who have grown accustomed to free services and content find the prospect of having to pay for those rather appalling On the other hand there is evidence that there is at least some degree of willingness to pay for digital content among online consumers These controversial findings show that there is still a lot to be learned about business models pricing strategies and consumer attitudes towards paid content It seems as if online consumers are definitely willing to pay for content

Copyright for DVDs - High-Tech Development - Blessing or Curse? Julli Markgraf, 2004-03-02 Seminar paper from the year 2003 in the subject Law Media Multimedia Law Copyright grade 62 % Bond University Australia Law School course Intellectual Property language English abstract Following up the last mentioned development the copyright of DVD s and the protective sanctions which the copyright owners of the film industry imposed will be the central focus of the assignment However the paper will not address the issue of downloading film data from the Internet For the purpose of that paper the question of backing up purchased DVD s will be the major focus Under the Copyright Act 1968 Cth film is defined under secondary work In order to distinguish works from secondary works the Copyright Act 1968 defines protection of forms of expression that are artistic literary dramatic and musical items 4 as works whereas mechanical rights such as films sound recordings television broadcasts and published editions 5 are defined as secondary work The reason for that differentiation is that secondary work is generally based on a work However the copyrights exist independent of each other simultaneously 6 Furthermore film is defined as the aggregate of visual images capable of being shown as a moving picture including the soundtrack 7 This also includes movies which are made by computer animation such as *Finding Nemo* for example Moreover even interactive video games fall under the definition of film since the decision of *Saga Enterprises LTD v Galaxy Electronics Pty Ltd* 1997 147 ALR 2 However the paper will not deal with cinematographic films defined under that case interactive games but will only focus on movies in a classical understanding As previously mentioned the film industry developed several protective strategies which were supposed to

resist against copyright piracy However the copyright owners had to face several bitter discomfitures A 15 year old Norwegian used basic mathematic formulas and cracked the protective code New high tech technology offers devices for easy DVD copying of already purchased products The segmentation of the market in several area codes is facing the test of the infringement of competition law Also subject to the question of competition law was the question dealt with in the Australian case Australian Video Retailers Association Ltd v Warner Home Video Pty Ltd 2001 FCA 1719 where Australian Video Retailers refused to accept the Warners approach of introducing two different DVD types on the market one for retail and one for rental 4 Quirk P Forder J Electronic Commerce and The Law p 181 5 s above p 181 6 s above p 181 7 s above p 187
