## Lab 1 Simulation: The Moving Man

### Objectives

To explore position and velocity graphs of an object moving in different ways.

### Familiarization

There are two tabs for this simulation, called "Introduction" and "Charts." For today's activity, you will need only the "Introduction" tab.

Play with the controls of the simulation to get used to the controls. Can you find...

- ☐ two ways to move the man around?
- ☐ how to make the man move automatically?
- ☐ how to record and playback the man's motion?
- ☐ how to playback the man's motion in slow motion?
- ☐ how to quickly reset the man to starting conditions?

### Constant Velocity

1. Reset all of the man's values to zero.
2. Using the position slider, set the man to stand near the tree. Give him a velocity of 1.2 m/s (and an acceleration of 0).
3. Click ▶ to start the man in motion until he hits the wall, then hit II to stop recording.
4. Use the playback feature to answer these questions.
  - a. What happened to the blue position slider as the man moved across the screen?
  - b. What happened to the red velocity slider as the man moved across the screen?
5. Use the playback feature to record the man's position and velocity data.

How can students learn to do so? How can educators design for learning this? These are fundamental challenges to many forms of education. The challenges are amplified in contemporary society where people traverse many different contexts and where contexts themselves are continuously changing. Designing

for Situated Knowledge Transformation provides a structured answer to these questions through an investigation of the theoretical empirical methodological and pedagogical design aspects which they involve Raising profound questions about the nature of knowledge of situativity and of transfer transformation and resituation it calls for and provides extended empirical studies of the forms of transformation that knowledge undergoes when people find themselves in new contexts while relying on existing knowledge Considering many avenues of practical application and insight Designing for Situated Knowledge Transformation develops a coherent framework for developing learning designs for knowledge transformation that is crucial in today s educational settings     *AAPT Announcer* American Association of Physics Teachers,1987     A
