in Science** Mageswary Karpudewan,Ahmad Nurulazam Md Zain,A.L. Chandrasegaran,2017-02-28 This book discusses the
importance of identifying and addressing misconceptions for the successful teaching and learning of science across all levels
of science education from elementary school to high school It suggests teaching approaches based on research data to
address students common misconceptions Detailed descriptions of how these instructional approaches can be incorporated
into teaching and learning science are also included The science education literature extensively documents the findings of
studies about students misconceptions or alternative conceptions about various science concepts Furthermore some of the
studies involve systematic approaches to not only creating but also implementing instructional programs to reduce the
incidence of these misconceptions among high school science students These studies however are largely unavailable to
classroom practitioners partly because they are usually found in various science education journals that teachers have no
time to refer to or are not readily available to them In response this book offers an essential and easily accessible guide
