proceeding to answer the questions posed in this book Other readers will prefer to comprehensively study the contents of pulmonary medicine entirely and use this book afterwards The purpose of the last two methods is to permit the reader to uncover areas of weakness and to become familiarised with the process of answering questions Answering questions during a board exam is a cognitive task which requires different faculties than reading a textbook The chapters are organised to include all aspects of pulmonary medicine The questions within each chapter are randomly presented to simulate board exams and the way questions arise in real life
