

An extensive test programme led to the development and certification of an optional kit for the T77, including deflation valves on the main and towed wheel legs, an alternate restraint (based on the standards of the aircraft), protection on the towed wheel legs and for the hydraulic brake line and the speed brake control system, strengthening of the V101, D800 and ATC vessels on the underside of the fuselage and various adaptations ("blow away pins" beneath the engine brackets, the deflation on the forward-retracting nose wheel is of such nature that it cannot be forced in the normal wheel well and so

In the event, the point was reached on 14 February 1961 when the German airline Lufthansa announced a contract for 75 Boeing 555s for a period, including spares, of about 100 (100:12:10:00:00). The launch decision came after a period of intensive discussion.
