Confronting Dogmatism In Gifted Education:

Confronting Dogmatism in Gifted Education Don Ambrose, Robert Sternberg, Bharath Sriraman, 2013-06-17 This book looks beyond the predominant conceptual frameworks that dominate thinking about giftedness and talent. Leading thinkers in the field of gifted education question fundamental assumptions about high ability and probe the larger contexts that influence gifted education.

Conceptions of Giftedness and Talent Robert J. Sternberg, Don Ambrose, 2020-12-18 This book brings together eminent and emerging scholars to present cutting edge research on diverse conceptions of giftedness and talent from a range of international perspectives. It covers classical views emphasizing IQ but also seeks to move the academic debate on from the common exclusive emphasis on IQ based skills. In each chapter the contributors address both theoretical advances and practical applications for administrators, teachers and parents. The editors conclude by integrating the different points of view and showing ways in which major ideas, even when given different names, can be integrated to provide a holistic and integral viewpoint on giftedness and talent. This book will appeal to students and scholars of creativity, giftedness and gifted education as well as to practitioners, teachers and education policymakers.

At the Intersection of Selves and Subject Ellyn Lyle, 2017-08-28 *At the Intersection of Selves and Subject: Exploring the Curricular Landscape of Identity* aims to raise awareness of the inextricability of our teaching and learning selves and the subjects with whom and which we engage. By exploring identity at this intersection, we invite scholars and practitioners to reconceptualize relationships with students, curriculum and their varied contexts. Our hope is to encourage authenticity, consciousness and criticality that will foster more liberating ways of teaching and learning. This collection will be useful for pre and in service teachers, teacher educators and educational researchers. It is a valuable resource for teacher education courses such as Curriculum Studies, Reflexive Practice, Philosophy of Education, Sociology of Education, Teaching Methods, Current Issues in Education, Collaborative Inquiry and Narrative Inquiry. *At the Intersection of Selves and Subject* lays bare the deepest under layers of the teacher self and subject with new energy. The sharing of reflexive inquiries in ethical self consciousness liberates and unwraps queries into pedagogical practice. This is an important book for all educators but especially for pre service teachers as they consider or challenge the donning of teacher identity. Pauline Sameshima, Canada Research Chair in Arts Integrated Studies, Lakehead University and Editor in Chief of the *Journal of the Canadian Association for Curriculum Studies*. A pendant of images and texts, this collection is a dazzling display of Ellyn Lyle's insight that understanding self is a way to understand other and society. That and other affirmations are depicted narratively and theoretically across and within indigeneities, singular, exceptional identities and paradoxical and inherently political identities. This collection invites us to work from within to reconstruct the self professionally. This pulsating portrait of juxtapositions teaches transpositions and extricates intertextualities. Through resolve, we are preserving this fragile, someday shared space for being. Open this book as entering one such space; study what this pendant refracts in you. William F. Pinar, Canada Research Chair, University of British

Columbia Vancouver *Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective* Chang Liu, Linden John Ball, Haiying Long, Wangbing Shen, 2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive processes and mechanisms in the creativity process at both individual and collective levels across different cultures by using theoretical and empirical evidence *A Critique of Creativity and Complexity* Don Ambrose, Bharath Sriraman, Kathleen M.

Pierce, 2014-11-04 In an increasingly complex world the natural human inclination is to oversimplify issues and problems to make them seem more comprehensible and less threatening This tendency usually generates forms of dogmatism that diminish our ability to think creatively and to develop worthy talents Fortunately complexity theory is giving us ways to make sense of intricate evolving phenomena This book represents a broad interdisciplinary application of complexity theory to a wide variety of phenomena in general education STEM education learner diversity and special education social emotional development organizational leadership urban planning and the history of philosophy The contributors provide nuanced analyses of the structures and dynamics of complex adaptive systems in these academic and professional fields

Giftedness and Talent in the 21st Century Don Ambrose, Robert J. Sternberg, 2016-07-15 When today's gifted and talented young people emerge into adulthood will they be able to overcome some enormous 21st century problems that are pushing us toward large scale socioeconomic devastation Will they be able to capitalize on unprecedented opportunities that can lead to

widespread prosperity and fulfillment This book explores these questions while yielding insights from many of the world's leading scholars of giftedness and talent development Until now there has been inadequate understanding of 21st century trends and issues that influence the gifted and talented The book provides some clarity by establishing a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describing some ways in which those pressures simultaneously suppress distort and invigorate the discovery of aspirations and the development of talents Throughout the volume prominent scholars of gifted education and talent development use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world This impressive volume edited by two of the world's leading thinkers on these topics includes the perspectives of many of our best thinkers on issues of talent development and giftedness and they offer an array of provocative perspectives on how we can better address our culture's and our economy's tremendous need for talent in the 21st century Jonathan Plucker Julian C Stanley Endowed Professor of Talent Development Johns Hopkins University Turbulence in the subtitle is apt The text Giftedness and Talent in the 21st Century is filled with strongly voiced perspectives from international authors who focus on how to conceptualize education as a creative and holistic enterprise within the context of globalization Ann Robinson Past President National Association for Gifted Children

Creativity, Design Thinking and Interdisciplinarity Frédéric Darbellay, Zoe Moody, Todd Lubart, 2017-12-18 This book at the crossroads of creativity design and interdisciplinary studies offers an overview of these major trends in scientific research society culture and economics It brings together different approaches and communities around a common reflection on interdisciplinary creative design thinking This collective effort provides a unique dialogical and convergent space that deals with the challenges and opportunities met by researchers and practitioners working on design thinking creativity and inter and transdisciplinarity or at the interface between these areas *The Psychology of Wisdom* Robert J. Sternberg, Judith Glück, 2022-06-09 The Psychology of Wisdom An Introduction is the first comprehensive coursebook on wisdom providing an engaging balanced and expert introduction to the psychology of wisdom It provides a comprehensive and up to date account of the psychological science of wisdom covering wide ranging perspectives Each chapter includes extensive pedagogy including a summary a glossary bolded terms practical applications discussion questions and a brief description of the authors research Topics include the philosophical foundations folk conceptions and psychological theories of wisdom relations of wisdom to morality and ethics to personality and well being to emotion wisdom and leadership wisdom and social policy These topics are covered in a non technical bias free and student friendly manner Written by the most eminent experts in the field this is the definitive coursebook for undergraduate and graduate students as well as interested professionals and researchers **Creative Intelligence in the 21st Century** Don Ambrose, Robert J. Sternberg, 2016-07-15 How can creative individuals and societies adapt to complex 21st century conditions Will civilizations thrive or collapse in the decades to come

if they are not creative enough or if they are too creative Interest in these questions is growing however until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts The book begins with a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describes some ways in which those pressures simultaneously suppress distort and invigorate creativity in general and creative education in particular After that prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world The world's problems are complex messy and seemingly intractable but history tells us that human creativity finds solutions to even the most daunting problems This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today helping chart a path forward for creativity in the 21st century Jonathan Plucker Julian C Stanley Endowed Professor of Talent Development Johns Hopkins University A volume taking on macro opportunities and macroproblems by editors Ambrose and Sternberg is a treat for readers who want to think big and think forward Kick back for an imaginative journey that reaches back to early global insights but propels us solidly into the 21st century and beyond Ann Robinson Past President National Association for Gifted Children **Family** ,1984 **Western Journal of Education** ,1900 *Tyranny of Reason* Yuval Levin,2001 The astonishing success of the natural sciences in the modern era has led many thinkers to assume that similar feats of knowledge and power should be achievable in human affairs That assumption and the accompanying notion that the methods of modern science ought to be applied to social and political questions have been at the heart of a number of prominent philosophical schools in the modern age and much of the politics of the past century Is the application of scientific logic to the study of human affairs philosophically defensible Does it aid or hinder our efforts at a genuine understanding of the human world Why have so many modern ideologies including those responsible for some of the greatest atrocities of the 20th century advanced themselves under the banner of science Why in other words do we assume that modern science holds the key to an understanding of human affairs Are we right to make this assumption And what does the assumption mean for contemporary society and politics *Tyranny of Reason* which is designed for the interested lay reader and for undergraduate or beginning graduate students in the social sciences attempts to answer these important questions in the context of the history of philosophy **Current Index to Journals in Education** ,1999 Journal of the National Association of Deans of Women ,1947 The June number contains Proceedings of the annual meeting 1938 **Americans** Hermann Hagedorn,1946 **Journal** National Association of Women Deans and Counselors,1945 The June number includes Proceedings of the annual meeting 1938 Journal of Education ,1883 **Friends' Intelligencer** ,1904 **Research in Education** ,1968 **The Mechanical World** ,1917
