A congruence transformation like a translation, reflection, rotation or composition of the above preserves the side lengths and angle measures.

A transformation that map  $\triangle LMN$  to  $\triangle UVW$  is

A transformation that map  $\triangle LMN$  to  $\triangle RST$  is

Describe a congruence transformation that maps quadrilateral ABCD to quadrilateral EFGH.

Describe a congruence transformation that maps quadrilateral ABCD to quadrilateral KITE.

A reflection across two parallel lines results in a

translation of 9 units, that's twice as far as the distance between the parallel lines.

Axelsson, V. A. Barker, 2014-05-10 Finite Element Solution of Boundary Value Problems Theory and Computation provides an introduction to both the theoretical and computational aspects of the finite element method for solving boundary value problems for partial differential equations This book is composed of seven chapters and begins with surveys of the two kinds of preconditioning techniques one based on the symmetric successive overrelaxation iterative method for solving a system of equations and a form of incomplete factorization The subsequent chapters deal with the concepts from functional analysis of boundary value problems These topics are followed by discussions of the Ritz method which minimizes the quadratic functional associated with a given boundary value problem over some finite dimensional subspace of the original space of functions Other chapters are devoted to direct methods including Gaussian elimination and related methods for solving a system of linear algebraic equations The final chapter continues the analysis of preconditioned conjugate gradient methods concentrating on applications to finite element problems This chapter also looks into the techniques for reducing rounding errors in the iterative solution of finite element equations This book will be of value to advanced undergraduates and graduates in the areas of numerical analysis mathematics and computer science as well as for theoretically inclined workers in engineering and the physical sciences      Fundamentals of Elementary Mathematics Merlyn J.
