

Project – Art with Conics

Conic sections are used in a wide variety of fields and are present in the world around you. You are going to use conic sections to create a work of art. This will require you to identify the presence of curves in familiar images and connect them to mathematical forms. The picture below is a very simple example. Your picture should incorporate greater complexity and creativity.

Directions:

Create a Desmos account if you do not already have one. On graph paper, sketch a rough design that incorporates various curves and shapes related to conic sections. Then create your design in Desmos using mathematical equations. If you wish to replicate an image, you may choose to paste it in Desmos and then create the curves to trace it.

Your work should have at least 15 curves, with at least 2 for each type of conic section. You may include other types of graphs (lines, sine, ...)

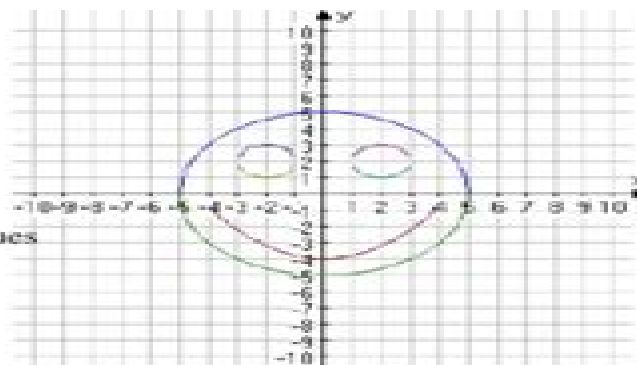

Share your final product with Ms. Jackson at msjacksoncghs@gmail.com. It is recommended that you submit it by 11/22/19, but you may turn it in as late as 11/24/19 with no penalty.

The picture below is a very simple example. Your picture should incorporate greater complexity and creativity.

1. A circle that makes up the outline of the face. The equation of this circle is $x^2 + y^2 = 5^2$.

2. The right eye is a circle with center at (2,2) and radius 1. The equation is $(x-2)^2 + (y-2)^2 = 1$. The left eye

3. The smile is a parabola. The vertex is (0,-4) and the point (2,-3) is on the parabola. By solving for a (show work), you get the equation $y = 3/16 x^2 - 4$. Graph the smile only for x values between -4 and 4. To restrict the domain in Desmos, include $\{-4 \leq x \leq 4\}$ after the equation.

This project will count as a quiz grade. You may search the internet for ideas, but you will receive a 0 if you plagiarize. This includes making minor tweaks to an existing work. See Ms Jackson's website for past works by Cedar Grove students (...More → Student Work)
