*are #BuildingResilience to Climate Change*

The global buildings and construction sector accounts for around 40% of energy use and 39% of energy-related carbon emissions, including embodied carbon<sup>1</sup>

## GOAL 7: Affordable and Clean Energy

Sustainable buildings provide access to affordable, reliable and clean energy by prioritising energy efficiency and low- or zero-carbon energy sources.

## GOAL 13: Climate Action

Considering the importance of the longevity of buildings, sustainable buildings support clean energy used efficiently, and sustainable cities work alongside individual buildings to decarbonise public resources and infrastructure and incorporate future-proofing mechanisms to improve resilience and adaptation to future climate change.

## GOAL 15: Life on Land

Sustainable buildings provide access to nature for everyone and enable nature-based solutions that enhance resilience and support biodiversity and ecosystem services.

## GOAL 17: Partnerships for the Goals

Sustainable buildings and cities are created through powerful partnerships that enhance knowledge sharing and ambition across the three pillars of sustainability – planet, people and economics.
