

4.2.2 Part 2: Consider a spherical cow...in space! (4 pts + 1 EC 451)

Consider a spherical human¹ at the *center* of a spherical space capsule, both of which act as perfect blackbodies of homogenous temperature, lost in the vacuum of space and sufficiently far from any star that we can ignore any solar radiation. Humans metabolize about 2,000 kcal of energy per day (dispersed as heat), or about 2.3 kWh (as there are 860 kcal per kWh), which is nearly equivalent to constant power consumption of 100 W, although larger or more active humans may require over 3,000 kcal (i.e. run at about 150+ W). A standard textbook value for human surface area is 1.7 m^2 , and humans (attempt to) actively maintain a fairly homogenous

Consider A Spherical Cow Answers:

Consider a Spherical Cow John Harte, 1988-01-17 Offers a variety of techniques for approaching contemporary environmental problems such as energy and water resources food production indoor air pollution acid rain human influences on climate and so on Back cover Matter and Interactions Ruth W. Chabay, Bruce A. Sherwood, 2011 Matter and Interactions offers a modern curriculum for introductory physics calculus based It presents physics the way practicing physicists view their discipline and integrates 20th Century physics and computational physics The text emphasizes the small number of fundamental principles that underlie the behavior of matter and models that can explain and predict a wide variety of physical phenomena Matter and Interactions will be available as a single volume hardcover text and also two paperback volumes *Solutions to 101 Homework Problems* John Harte, 2024-09-20 This detailed Solutions Manual accompanies the new 2nd edition of John Harte's innovative problems text Consider a Spherical Cow One of the best ways for a student to develop a complete understanding of difficult concepts is by working through and solving problems This Solutions Manual accompanies John Harte's Consider a Spherical Cow 2nd Edition restating the 101 homework problems and including detailed solutions Written to develop students' high level of creative problem solving skills the homework exercises cover the tools and topics developed in the main text These all original problems about half of which are open ended have been thoroughly road tested in Harte's courses over the years **Critical Skills for Environmental Professionals** Jennifer Pontius, Alan McIntosh, 2019-12-20 This textbook focuses on a set of skills based learning outcomes common among undergraduate environmental programs It covers critical scientific skills and ways of thinking that bridge the gap between the knowledge based content of introductory environmental textbooks and the professional skills students of the environment need to succeed in both their academic programs and professional careers This emphasis on skills is gaining more traction among academic programs across the country as they shift focus from knowledge delivery to learning outcomes and professional competencies The book features clear methodological frameworks engaging practice exercises and a range of assessment case studies suitable for use across academic levels For introductory levels this text uses guided practice exercises to expose students to the skills they will need to master At the capstone level this text allows students to apply the knowledge they have gained to real world issues and to evaluate their competency in key programmatic learning outcomes A detailed answer key with rubrics customized for specific questions and sample answers at various competency levels is available to verified course instructors Access to these answer key resources can be obtained by contacting the Springer Textbook Team at Textbooks.springer.com *Consider a Spherical Cow, second edition* John Harte, Maxine Singer, 2024-03-06 This textbook teaches how to make and derive useful insight from relatively simple models of many seemingly complex environmental problems facing our world today This new edition of Consider a Spherical Cow teaches basic mathematical modeling skills that are widely applicable to a huge range of environmental problems facing the world

today Organized both by modeling tools and environmental topics this innovative book includes 56 posed problems and worked out solutions Readers will find introductions to topics extensive pedagogic material explaining how to use the relevant modeling tools and opportunities to think more deeply about or confirm steps in the provided solutions This new edition includes 101 new quantitative homework exercises an appendix compendium of updated environmental data a glossary and a bibliography plus entirely new sections on probability toxics radiation and radioactivity and epidemics With wide topical coverage Harte teaches the math step by step in the context of actual posed environmental problems emphasizes limitations and strengths of models and describes practical applications to real problems and situations Along with the many worked out problems discussion questions and quantitative problems are provided as exercises for the reader The book emphasizes creative applications of math to environmental science not plug in problems

The Chemical World John C. Kotz,1994

A Course in Mathematical Modeling Douglas D. Mooney,Randall J. Swift,2021-11-15 The emphasis of this book lies in the teaching of mathematical modeling rather than simply presenting models To this end the book starts with the simple discrete exponential growth model as a building block and successively refines it This involves adding variable growth rates multiple variables fitting growth rates to data including random elements testing exactness of fit using computer simulations and moving to a continuous setting No advanced knowledge is assumed of the reader making this book suitable for elementary modeling courses The book can also be used to supplement courses in linear algebra differential equations probability theory and statistics

On Growth, Form and Computers Sanjeev Kumar,Peter J. Bentley,2003-10-03 Conceived for both computer scientists and biologists alike this collection of 22 essays highlights the important new role that computers play in developmental biology research Essays show how through computer modeling researchers gain further insight into developmental processes Featured essays also cover their use in designing computer algorithms to tackle computer science problems in areas like neural network design robot control evolvable hardware and more Peter Bentley noted for his prolific research on evolutionary computation and Sanjeev Kumar head up a respected team to guide readers through these very complex and fascinating disciplines Covers both developmental biology and computational development the only book of its kind Provides introductory material and more detailed information on BOTH disciplines Includes contributions from Richard Dawkins Lewis Wolpert Ian Stewart and many other experts

El Niño and the Peruvian Anchovy Fishery Edward A. Laws,1997 This module which examines El Nino and its impact on the Peruvian anchovy fishery includes study questions and answers as well as a computer game that allows students to test the impacts of economic and climatic variables on the fish population

Matter and Interactions I Ruth W. Chabay,Bruce A. Sherwood,2007 The overall goal of this calculus based text is to provide an introduction to physics with a modern point of view It emphasizes the atomic nature of matter macro micro connections and modeling complex physical systems The approach is designed to go beyond low level physics and to build upon readers prior preparation The first volume deals with mechanics and thermal physics in a unified

way with strong emphasis on atomic level description and analysis The ball and spring model of solids is a major theme
 culminating in computing the specific heat as a function of temperature for an Einstein solid using the concepts of statistical
 mechanics The Dynamic Environment Leonard J. Soltzberg,1996 This volume is intended to illuminate the environmental
