

Name: _____

Date: _____

Pedigrees

Pedigrees are diagrams that illustrate the existence of a specific genetic trait among organisms and their ancestors. They can be important tools in determining patterns of inheritance. Symbols are used to represent male and female individuals. Shading is used to show an individual carries the affected allele.

Male

Affected male

Female

Affected female

Autosomal recessive: Two copies of the recessive allele are needed to have the disorder (dd). Females and males are affected equally. Most harmful genetic conditions are recessive.

Autosomal dominant: Only one copy is needed to have the disorder ($D_\$). Females and males are affected equally.

Sex-linked: Gene is located on the X chromosome (dominant X^D , recessive X^d). Males are affected more than females if it is a recessive trait. All daughters of an affected male will be affected if it is a dominant trait.

Pedigree #1: Study the pedigree below and answer the questions that follow.

1. How many generations are in this pedigree? ____
2. How many marriages are in this pedigree? ____
3. How many individuals are affected? ____
4. What is the sex of II-4? ____
5. How many children did couple I-1 and I-2 have? ____
6. Who did III-2 marry? ____
7. What is the genotype of individual II-3? ____ II-5? ____ III-3? ____ IV-1? ____
Add shading to any symbols that need it.

Parallel Curriculum Units for Science, Grades 6-12 Jann H. Leppien, Jeanne H. Purcell, 2011-02-15 Teachers at various stages of professional development in curriculum design will find these materials powerful examples that will guide their growth and development and sharpen their skills Mary L Slade Professor James Madison University Harrisonburg VA Supercharge your science curriculum to challenge all students Based on the best selling book The Parallel Curriculum this

professional development resource gives multifaceted examples of rigorous learning opportunities for science students in Grades 6-12. The four sample units revolve around genetics, the convergence of science and society, the integration of language arts and biology, and the periodic table. The editors and contributors provide user-friendly methods for creating more thoughtful lessons and show how to differentiate them for the benefit of all students. Included are field-tested and standards-based strategies that guide students through Exploring the nature of knowledge, Discovering connections between science and other subjects, Deepening science comprehension according to their interests and abilities, Connecting science to society through the study of genetics, historic events, literature, and chemistry. Each unit includes subject matter background, a content framework, study components, teacher reflections, and sample lessons. Also available are online content tools such as handouts, PowerPoint presentations, and research activities. Breathe new life into science learning with this powerful guidebook written by master educators.

Development of Life Skills-II Shalini Verma, Life skills are essentially individual abilities that help in promoting mental well-being and competence in people to deal with the various situations in life. This book presents various aspects of life skills including communication, self-analysis, self-development, and study habits. These are crucial elements in determining one's personal and professional growth. Developed in accordance with the new syllabus of the West Bengal Council of Technical Education and written in an interactive style, this course book will help the students inculcate the various life skills and enhance their acceptability and growth in this highly competitive world.

KEY FEATURES Opening Case Study in every chapter along with case analysis-based class discussion to encourage students to apply their analytical skills. Assess Your Understanding to test understanding and assimilation of the information shared in the passages. Story Time with short interesting stories that allow learners to develop critical thinking skills from the old classics. In-class Team Activity in the form of role plays, debates, discussion, etc. Experiential Learning to gauge the students' understanding of the concepts and to measure how much of the learning they are able to apply in real life.
