Construction Management 4th Edition Halpin:

Construction Management Daniel W. Halpin, Bolivar A. Senior, Gunnar Lucko, 2017-08-07 It is often said that the construction professional has to be a jack of all trades and master of all. This text covers a wide range of subjects reflecting the breadth of knowledge needed to understand the dynamics of this large and complex industry. This edition includes updated chapters on planning and scheduling, a new chapter addressing linear scheduling methods, material regarding the historical background of construction as a profession, and includes an Instructor Resource of solutions to the end of chapter review exercises. This text has become a standard course text at many universities. The first four editions have enjoyed wide success as an introductory treatment of the subjects which are critical to success in the construction industry. This fifth edition preserves the features that have been most appreciated by its users throughout the years and adds suggestions provided by instructors and students through formal surveys and informal feedback to the authors. **Construction**

Management Daniel W. Halpin, 2010-10-18 The construction professional has to be a jack of all trades and master of all. This text covers a wide range of subjects reflecting the breadth of knowledge needed to understand the dynamics of this large and complex industry. This edition introduces extended coverage in the scheduling area to address more advanced and practice oriented procedures such as Start to Start, Finish to Finish, and similar relationships between activities in a network schedule.

Construction Project Scheduling and Control Saleh A. Mubarak, 2019-07-20 Ensure successful construction projects through effective project scheduling and control. The success of a construction project is dependent on a schedule that is well defined yet flexible to allow for inevitable delays or changes. Without an effective schedule, projects often run over budget and deadlines are missed, which can jeopardize the success of the project. The updated Construction Project Scheduling and Control Fourth Edition is a comprehensive guide that examines the analytical methods used to devise an efficient and successful schedule for construction projects of all sizes. This Fourth Edition describes the tools and methods that make projects run smoothly with invaluable information from a noted career construction professional. Construction Project Scheduling and Control Fourth Edition offers construction professionals a redefined Critical Path Method (CPM) and updated information on Building Information Modeling (BIM) and how it impacts project control. This Fourth Edition includes worked problems and scheduling software exercises that help students and practicing professionals apply critical thinking to issues in construction scheduling. This updated edition of Construction Project Scheduling and Control includes a revised chapter on the Critical Path Method (CPM) and an all new chapter on project scheduling and control as viewed through the owner's perspective. Provides numerous worked problems and construction scheduling exercises. Includes an expanded glossary and list of acronyms. Offers updated instructor materials including PowerPoint lecture slides and an instructor's manual. Written for undergraduate and graduate students in construction management, civil engineering, and architecture, as well as practicing construction management professionals.
