Micklitz, Mateja Durovic, André Janssen, 2022-08-25 This book looks at the consumer protection offered in a range of Asian countries for example China Japan and South Korea in key areas such as consumer sales law unfair terms product liability and unfair commercial practices However it is interesting to note that consumer protection is on the rise everywhere and to compare how this differs depending upon the legal cultures It is also fascinating to reflect on the influence of models for law reform such as the EU laws ASEAN has also affected the development of consumer policy for its member states The book takes the form of national reports which explain the development of the law and also shed light on how the law works in practice The book also contains thematic reports which look at each area of the law from a comparative perspective Commentators from around the globe reflect on their impression of Asian consumer law based on their own differing legal systems and benchmarks A must read for anyone with an interest in consumer law in Asia and beyond this book will form the basis of further research and discussion internationally *Law and Corporate Behaviour* Christopher

Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the

recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional s International Arbitration online service
