pilots do in the cockpit what's really worth worrying about when it comes to airline safety and why we get sick on planes. Meanwhile Gerchick ponders the jarring disconnect between our quaint expectations of service with a smile and the grim reality of cramped seats, no free lunch, and watch yer knees. With sympathy for both fliers and airlines, Gerchick shows how the new business-all-business airline industry has finally learned to make money even in the face of crushing fuel costs and get millions of travelers where they're going every day safely and quickly. From his singular vantage point as former aviation regulator and policymaker, Gerchick gives us a straightforward insider's view of how hard it is for government to improve the traveler's lot by explaining the vagaries of consumer protection rules as well as the political realities and the economic forces at work. While Gerchick offers reasons to hope for a better future in air travel, he presents an unvarnished look at what we can expect good and bad when we take to the skies. Some of it will reassure you, some will make you cringe, but all will open your eyes to what it means to fly today. **Air Pictorial**, 2002
