New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field The forty four articles in this book take stock of the history evolving literature and current trajectories of new world history These essays together with the editors introductions to thematic chapters encourage educators and students to reflect critically on the development of the field and to explore concepts approaches and insights valuable to their own work The selections are organized in ten chapters that survey the history of the movement the seminal ideas of founding thinkers and today s practitioners changing concepts of world historical space and time comparative methods environmental history the big history movement globalization debates over the meaning of Western power and ongoing questions about the intellectual premises and assumptions that have shaped the field **The Global Lives of Things** Anne Gerritsen, Giorgio Riello, 2015-11-19 The Global Lives of Things considers the ways in which things ranging from commodities to works of art and precious materials participated in the shaping of global connections in the period 1400 1800 By focusing on the material exchange between Asia Europe the Americas and Australia this volume traces the movements of objects through human networks of commerce colonialism and consumption It argues that material objects mediated between the forces of global economic exchange and the constantly changing identities of individuals as they were drawn into global circuits It proposes a reconceptualization of early modern global history in the light of its material culture by asking the question what can we learn about the early modern world by studying its objects This exciting new collection draws together the latest scholarship in the study of material culture and offers students a critique and explanation of the notion of commodity and a reinterpretation of the meaning of exchange It engages with the concepts of proto globalization the first global age and commodities consumption Divided into three parts the volume considers in Part One Objects of Global

Knowledge in Part Two Objects of Global Connections and finally in Part Three Objects of Global Consumption The collection concludes with afterwords from three of the leading historians in the field Maxine Berg Suraiya Faroqhi and Paula Findlen who offer their critical view of the methodologies and themes considered in the book and place its arguments within the wider field of scholarship Extensively illustrated and with chapters examining case studies from Northern Europe to China and Australia this book will be essential reading for students of global history

Food Culture in the Caribbean Lynn M. Houston, 2005-06-30 Food in the Caribbean reflects both the best and worst of the Caribbean s history On the positive side Caribbean culture has been compared with a popular stew there called callaloo The stew analogy comes from the many different ethnic groups peacefully maintaining their traditions and customs while blending together creating a distinct new flavor On the negative side many foods and cooking techniques derive from a history of violent European conquest the importation of slaves from Africa and the indentured servitude of immigrants in the plantation system Within this context students and other readers will understand the diverse island societies and ethnicities through their food cultures Some highlights include the discussion of the Caribbean concept of making do using whatever is on hand or can be found the unique fruits and starches the one pot meal the technique of jerking meat and the preference for cooking outdoors The Caribbean is known as the cradle of the Americas The Columbian food exchange which brought products from the Caribbean and the Americas to the rest of the world transformed global food culture Caribbean food culture has wider resonance to North Central and South America as well The parallels in the food related evolution in the Americas include the early indigenous foods and agriculture the import and export of foods the imported food culture of colonizers settlers and immigrants the intricacies of defining an independent national food culture the loss of the traditional agricultural system the trade issues sparked by globalization and the health crises prompted by the growing fast food industry This thorough overview of island food culture is an essential component in understanding the Caribbean past and present
