Mass Shootings Jaclyn Schildkraut, H. Jaymi Elsass, 2016-02-22

This book provides readers and researchers with a critical examination of mass shootings as told by the media offering research based factual answers to oft asked questions and investigating common myths about these tragic events When a mass shooting happens the news media is flooded with headlines and breaking information about the shooters victims and acts

themselves What is notably absent in the news reporting are any concrete details that serve to inform news consumers how prevalent these mass shootings really are or are not when considering crime statistics as a whole what legitimate causes for concern are and how likely an individual is to be involved in such an incident Instead these events often are used as catalysts for conversations about larger issues such as gun control and mental health care reform What critical points are we missing when the media focuses on only what people want to hear This book explores the media attention to mass shootings and helps readers understand the problem of mass shootings and public gun violence from its inception to its existence in contemporary society It discusses how the issue is defined its history and its prevalence in both the United States and other countries and provides an exploration of the responses to these events and strategies for the prevention of future violence The book focuses on the myths purported about these unfortunate events their victims and their perpetrators through typical U S media coverage as well as evidence based facts to contradict such narratives The book s authors pay primary attention to contemporary shootings in the United States but also discuss early events dating back to the 1700s and those occurring internationally The accessible writing enables readers of varying grade levels including laypersons to gain a more in depth and accurate understanding of the context of mass shootings in the United States As a result readers will be better able to contribute to meaningful discussions related to mass shooting events and the resulting responses and policies Building a

Learning Culture in America Kevin P. Chavous, 2016-09-30 Building a Learning Culture in America takes an incisive no holds barred look at how America embraced and cultivated a culture of learning in the past how that culture declined in the sixties and seventies and what must be done to regain it From political gridlock to systemic discrimination Chavous details the many ways education today is off track and cites specific examples of what Americans might do to reform it Part memoir and part manifesto this is a frank fascinating and personal account of Chavous experience as a politician working to enact school choice in Washington DC and throughout the United States During the course of his political career he has seen political skirmishes and party scuffles interfere with the United States ability to improve its educational system These conflicts did not cause the problem they were merely a result The true problem was more basic the decline of America s learning culture This pivotal work calls for Americans to unite in making the changes needed to reestablish a learning culture as an inherent piece of the American national fabric and tells us how to begin **When Race Trumps Merit** Heather Mac Donald, 2023-04-18

Does your workplace have too few black people in top jobs It s racist Does the advanced math and science high school in your city have too many Asians It s racist Does your local museum employ too many white women It s racist too After the Black Lives Matter protests of 2020 prestigious American institutions from the medical profession to the fine arts pleaded guilty to systemic racism How else explain why blacks are overrepresented in prisons and underrepresented in C suites and faculty lounges their leaders asked The official answer for those disparities is disparate impact a once obscure legal theory that is now transforming our world Any traditional standard of behavior or achievement that impedes exact racial proportionality in

any enterprise is now presumed racist Medical school admissions tests expectations of scientific accomplishment in the award of research grants the enforcement of the criminal law all are under assault because they have a disparate impact on underrepresented minorities When Race Trumps Merit provides an alternative explanation for those racial disparities It is large academic skills gaps that cause the lack of proportional representation in our most meritocratic organizations and large differences in criminal offending that account for the racially disproportionate prison population The need for such a corrective argument could not be more urgent Federal science agencies now treat researchers skin color as a scientific qualification Museums and orchestras choose which art and music to promote based on race Police officers avoid making arrests and prosecutors decline to bring charges to avoid disparate impact on minority criminals When Race Trumps Merit breaks powerful taboos But it is driven by a sense of alarm supported by detailed case studies of how disparate impact thinking is jeopardizing scientific progress destroying public order and poisoning the appreciation of art and culture As long as alleged racism remains the only allowable explanation for racial differences we will continue tearing down excellence and putting lives as well as civilizational achievement at risk *Journal of the House of Representatives of the State of Connecticut* Connecticut.
