

HEREDITY PREDICTION ANALYSIS

Constructing and analyzing pedigrees from breeding and family data. When constructing a pedigree from data of families, breeders should distinguish between affected individuals that are mating and breeders that are nonreproductive breeders. Pedigrees are most often used by genetic researchers to identify causes for genetic disorders. However, breeders do so for different reasons. Breeders require pedigree information to identify breeding animals that are suitable for their purposes. Pedigree information is also used by breeders to select the best animals for their purposes.
