### **Visioning Technologies** Graham

Cairns,2016-12-08 *Visioning Technologies* brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world

Rethinking Dwelling Jeff Malpas,2021-07-15 Over the last twenty years Jeff Malpas research has involved his engagement with architects and other academics around the issues of place architecture and landscape and particularly the way these practitioners have used the work of Martin Heidegger In *Rethinking Dwelling* Malpas primary focus is to rethink of these issues in a way that is directly informed by an understanding of place and the human relation it With essays on a range of architectural and design concerns as well as engaging with other thinkers on topics including textuality in architecture contemporary high rise construction the significance of the line the relation between building and memory and the idea of authenticity in architecture this book departs from the traditional phenomenological focus and provides students and scholars with a new ontological assessment of landscape and architecture As such it may also be used on other spatial or topographic disciplines including geography sociology anthropology and art in which the spatial turn has been so important
