Sickening John Abramson, 2022-02-08 The inside story of how Big Pharma s relentless pursuit of ever higher profits corrupts medical knowledge misleading doctors misdirecting American health care and harming our health The United States spends an excess 1.5 trillion annually on health care compared to other wealthy countries yet the amount of time that Americans live in good health ranks a lowly 68th in the world At the heart of the problem is Big Pharma which funds most clinical trials and therefore controls the research agenda withholds the real data from those trials as corporate secrets and shapes most of the information relied upon by health care professionals In this no holds barred exposé Dr John Abramson one of the foremost experts on the drug industry s deceptive

tactics combines patient stories with what he learned during many years of serving as an expert in national drug litigation to reveal the tangled web of financial interests at the heart of the dysfunction in our health care system For example one of pharma's best kept secrets is that the peer reviewers charged with ensuring the accuracy and completeness of the clinical trial reports published in medical journals do not even have access to complete data and must rely on manufacturer influenced summaries Likewise for the experts who write the clinical practice guidelines that define our standards of care The result of years of research and privileged access to the inner workings of the U S medical industrial complex Sickening shines a light on the dark underbelly of American health care and presents a path toward genuine reform *The Truth About the Drug Companies* Marcia Angell, 2004-08-24 During her two decades at The New England Journal of Medicine Dr Marcia Angell had a front row seat on the appalling spectacle of the pharmaceutical industry She watched drug companies stray from their original mission of discovering and manufacturing useful drugs and instead become vast marketing machines with unprecedented control over their own fortunes She saw them gain nearly limitless influence over medical research education and how doctors do their jobs She sympathized as the American public particularly the elderly struggled and increasingly failed to meet spiraling prescription drug prices Now in this bold hard hitting new book Dr Angell exposes the shocking truth of what the pharmaceutical industry has become and argues for essential long overdue change Currently Americans spend a staggering 200 billion each year on prescription drugs As Dr Angell powerfully demonstrates claims that high drug prices are necessary to fund research and development are unfounded The truth is that drug companies funnel the bulk of their resources into the marketing of products of dubious benefit Meanwhile as profits soar the companies brazenly use their wealth and power to push their agenda through Congress the FDA and academic medical centers Zeroing in on hugely successful drugs like AZT the first drug to treat HIV AIDS Taxol the best selling cancer drug in history and the blockbuster allergy drug Claritin Dr Angell demonstrates exactly how new products are brought to market Drug companies she shows routinely rely on publicly funded institutions for their basic research they rig clinical trials to make their products look better than they are and they use their legions of lawyers to stretch out government granted exclusive marketing rights for years They also flood the market with copycat drugs that cost a lot more than the drugs they mimic but are no more effective The American pharmaceutical industry needs to be saved mainly from itself and Dr Angell proposes a program of vital reforms which includes restoring impartiality to clinical research and severing the ties between drug companies and medical education Written with fierce passion and substantiated with in depth research *The Truth About the Drug Companies* is a searing indictment of an industry that has spun out of control 2016, 00 0000 Pharma Gerald Posner, 2020-03-10 Award winning journalist and New York Times bestselling author Gerald Posner reveals the heroes and villains of the trillion dollar a year pharmaceutical industry and delivers a withering and encyclopedic indictment of a drug industry that often seems to prioritize profits over patients The New York Times Book Review Pharmaceutical breakthroughs such as anti biotics

and vaccines rank among some of the greatest advancements in human history Yet exorbitant prices for life saving drugs safety recalls affecting tens of millions of Americans and soaring rates of addiction and overdose on pre scription opioids have caused many to lose faith in drug companies Now Americans are demanding a national reckoning with a monolithic industry Gerald s dogged reporting sets Pharma apart from all books on this subject The Washington Standard as we are introduced to brilliant scientists incorruptible government regulators and brave whistleblowers facing off against company executives often blinded by greed A business that profits from treating ills can create far deadlier problems than it cures Addictive products are part of the industry s DNA from the days when corner drugstores sold morphine heroin and cocaine to the past two decades of dangerously overprescribed opioids Pharma also uncovers the real story of the Sacklers the family that became one of America s wealthiest from the success of OxyContin their blockbuster narcotic painkiller at the center of the opioid crisis Relying on thousands of pages of government and corporate archives dozens of hours of interviews with insiders and previously classified FBI files Posner exposes the secrets of the Sacklers rise to power revelations that have long been buried under a byzantine web of interlocking companies with ever changing names and hidden owners The unexpected twists and turns of the Sackler family saga are told against the startling chronicle of a powerful industry that sits at the intersection of public health and profits Explosively even addictively readable Booklist starred review Pharma reveals how and why American drug companies have put earnings ahead of patients *Big Pharma* Jack Reeves,2020-06-14 A story of corruption and greed in one of the biggest global business markets in the world the Pharmaceutical industry From the prospective of a senior drug rep the investigation into fraud in Big Pharma goes right to the top of the political spectrum
