Cryptographic Hardware and Embedded Systems - CHES 2001 Cetin K. Koc, David Naccache, Christof Paar, 2003-06-30

These are the proceedings of CHES 2001 the third Workshop on Cryptographic Hardware and Embedded Systems. The first two CHES Workshops were held in Massachusetts and this was the first Workshop to be held in Europe. There was a large number of submissions this year and in response the technical program was extended to 2 1/2 days. As is evident by the papers in these proceedings many excellent submissions were made. Selecting the papers for this year's CHES was not an easy task and we regret that we had to reject several very interesting papers due to the lack of time. There were 66 submitted contributions this year of which 31 or 47% were selected for presentation. If we look at the number of submitted papers at CHES 99 42 papers and CHES 2001 51 papers we observe a steady increase. We interpret this as a continuing need for a workshop series which combines theory and practice for integrating strong security features into modern communications and computer applications. In addition to the submitted contributions Ross Anderson from Cambridge University UK and Adi Shamir from The Weizmann Institute Israel gave invited talks. As in previous years the focus of the workshop is on all aspects of cryptographic hardware and embedded system design. Of special interest were contributions that describe new methods for efficient hardware implementations and high speed software for embedded systems e.g. smart cards microprocessors DSPs etc. CHES also continues to be an important forum for new theoretical and practical findings in the important and growing field of side channel attacks.

Correct Hardware Design and Verification Methods Laurence Pierre, Thomas Kropf, 2003-07-31

CHARME 99 is the tenth in a series of working conferences devoted to the development and use of leading edge formal techniques and tools for the design and verification of hardware and systems. Previous conferences have been held in Darmstadt 1984, Edinburgh 1985, Grenoble 1986, Glasgow 1988, Leuven 1989, Torino 1991, Arles 1993, Frankfurt 1995 and Montreal 1997. This workshop and conference series has been organized in cooperation with IFIP WG 10.5. It is now the biannual counterpart of FMCAD which takes place every even numbered year in the USA. The 1999 event took place in Bad Herrenalb a resort village located in the Black Forest close to the city of Karlsruhe. The validation of functional and timing behavior is a major bottleneck in current VLSI design systems. A predominantly academic area of study until a few years ago formal design and verification techniques are now migrating into industrial use. The aim of CHARME 99 is to bring together researchers and users from academia and industry working in this active area of research. Two invited talks illustrate major current trends: the presentation by Gerard Berry Ecole des Mines de Paris Sophia Antipolis France is concerned with the use of synchronous languages in circuit design and the talk given by Peter Jansen BMW Munich Germany demonstrates an application of formal methods in an industrial environment. The program also includes 20 regular presentations and 12 short presentations poster exhibitions that have been selected from the 48 submitted papers.
