O. Conceição,Les Howles,2023-07-03 This book provides instructors with a holistic way of thinking about learners learning and online course design The distinctive strategies derived from an integrated framework for designing the online learning experience help create an experience that is more personalized engaging and meaningful for online learners The focus of this book is on the learners and the design of their online learning experiences The authors refer to learning design instead of instructional design which focuses on instruction and places the instructor at the center stage of the process Therefore the focus is on approaching a learner s online course experience as a journey consisting of a combination of learning interactions with content instructor and other learners In most online courses instructors and learners are separated in time and space and depend on technology to facilitate interactions that often lack a strong personal dimension As online learning continues to proliferate and mature the emphasis on simply making content available to students online is no longer acceptable Creating online courses now requires a new way of thinking that incorporates new design ideas and approaches from a variety of fields it also requires a new set of learning design skills for instructors and course designers Organized into eight chapters this volume focuses on enhancing online learning experiences for each of the major aspects of an online course providing evidence based principles and strategies to promote learner engagement and deep learning The concluding chapter provides an example illustrating a real world application of the principles and strategies covered in the book using Design Thinking to create learning experiences This book provides strategies for approaching the learning experience from an integrative perspective for both experienced online instructors and those new to online course design These strategies are based on evidence based learning design principles and encourage the reader to adopt an empathic mindset focused on the experience of the learner **Resources in Education** ,1982 **Bibliographic**
