A Beginner's Guide to Generative AI Deepshikha Bhati, Fnu Neha, Angela Guercio, Md Amiruzzaman, Aloysius Bathi Kasturiarachi, 2025-08-22 This book is the essential guide for anyone curious about AI's creative power. In the rapidly evolving landscape of artificial intelligence, generative AI stands out as one of the most transformative technologies of our time. Designed for beginners and requiring no prior knowledge of AI, this book breaks down the fundamentals of generative AI from text and image generation to the workings of models like ChatGPT and Google Bard. The authors provide step-by-step coverage of the essential concepts and techniques that power generative AI. From the basics of how machines learn to generate text and images to the intricate workings of models like Transformers, ChatGPT, and Google Bard, readers will gain a solid foundation in AI's most cutting-edge tools. Rather than focusing on a single method, the authors introduce a spectrum of generative modeling techniques, including diffusion models, variational autoencoders, and transformers. This comprehensive exposure ensures readers will be well-prepared to understand and adapt to the rapidly evolving AI landscape. In addition, real-world applications of generative AI across various industries are explored, including healthcare innovations, business analytics, and legal technology, and the authors provide practical insights and examples that show how generative AI is revolutionizing these fields.

A Teacher's Guide to Conversational AI David A. Joyner, 2024-05-27 A Teacher's Guide to Conversational AI explores the practical role that language-based artificial intelligence tools play in classroom teaching, learning experiences, and student assessment. Today's educators are well-aware that conversational and generative AI chatbots, intelligent tutoring systems, large language models, and more represent a complex new factor in teaching and learning. This introductory primer offers comprehensive, novice-friendly guidance into the challenges and opportunities of incorporating AI into K-12 schools and college classes in ways that are appropriate, nourishing to students, and outcomes-driven. Opening with an informative overview of the foundational properties, key terminology, and ethical considerations of these tools, the book offers a coherent and realistic vision of classrooms that are enhanced rather than stymied by AI systems. This includes strategies for designing assessments that are conducive to students' beneficial use of AI while mitigating overreliance or dishonesty; using AI to generate lesson examples for student critique or custom content that reinforces course principles; leveraging chatbots as a co-instructor or a tutor; a guide during student-driven learning; a virtual debate or brainstorming partner; and a design project and creating course content, lesson plans, and activities. Expanded language and accessibility options and beyond. Through the depth of understanding and applied approach provided in these chapters, teachers and leaders in training and in service, alongside private tutors, college

instructors and other educators will be better prepared to future proof their efforts to serve new generations of learners

Guidance for generative AI in education and research Holmes, Wayne,Miao, Fengchun,UNESCO,2023-09-08

Publicly available generative AI GenAI tools are rapidly emerging and the release of iterative versions is outpacing the adaptation of national regulatory frameworks The absence of national regulations on GenAI in most countries leaves the data privacy of users unprotected and educational institutions largely unprepared to validate the tools UNESCO s first global guidance on GenAI in education aims to support countries to implement immediate actions plan long term policies and develop human capacity to ensure a human centred vision of these new technologies The Guidance presents an assessment of potential risks GenAI could pose to core humanistic values that promote human agency inclusion equity gender equality and linguistic and cultural diversities as well as plural opinions and expressions It proposes key steps for governmental agencies to regulate the use of GenAI tools including mandating the protection of data privacy and considering an age limit for their use It outlines requirements for GenAI providers to enable their ethical and effective use in education The Guidance stresses the need for educational institutions to validate GenAI systems on their ethical and pedagogical appropriateness for education It calls on the international community to reflect on their long term implications for knowledge teaching learning and assessment The publication offers concrete recommendations for policy makers and educational institutions on how the uses of GenAI tools can be designed to protect human agency and genuinely benefit learners teachers and researchers
