Gorlewski, 2011-07-01 Students in public schools serving poor and working class students are inundated by the effects of high stakes examinations Teachers are demoralized and students suffer substandard curricular and pedagogical experiences These effects are articulated by students and teachers in the high school that provided the setting for the critical ethnography on which this text is based Teachers resent being judged on the basis of students performance on standardized assessments They are deprofessionalized as their roles are oriented toward working class norms Students feel alienated by content that is meaningless and test based pedagogies that are disempowering While these findings are disturbing critical theory provides a foundation for seeking hope By incorporating inquiry and dialogue this theoretical framework opens a space where resistance can be revealed and examined In this case the study exposed glimmers of resistance spaces in the structure of schooling where students and teachers critique the system and suggest ways of subverting the negative effects of the neoliberal reforms through dialogic empowering culturally

responsive pedagogies Collective resistance achieved through dialogic pedagogies that build on understandings of resistance and power can cultivate theoretical and material spaces where a cycle of praxis can enhance possibilities for social justice To that end the conclusion is devoted to the implementation of critical dialogic approaches to literacies approaches intended to interrupt the hegemonic influences that perpetuate social reproduction by capitalizing on the potential for solidarity and collective agency among the students and teachers who populate and educate the working classes This book would interest teacher educators teachers and school administrators [Teaching Science Online](#) Dietmar Kennepohl,2023-07-03 With the increasing focus on science education growing attention is being paid to how science is taught Educators in science and science related disciplines are recognizing that distance delivery opens up new opportunities for delivering information providing interactivity collaborative opportunities and feedback as well as for increasing access for students This book presents the guidance of expert science educators from the US and from around the globe They describe key concepts delivery modes and emerging technologies and offer models of practice The book places particular emphasis on experimentation lab and field work as they are fundamentally part of the education in most scientific disciplines Chapters include Discipline methodology and teaching strategies in the specific areas of physics biology chemistry and earth sciences An overview of the important and appropriate learning technologies ICTs for each major science Best practices for establishing and maintaining a successful course online Insights and tips for handling practical components like laboratories and field work Coverage of breaking topics including MOOCs learning analytics open educational resources and m learning Strategies for engaging your students online [Teaching High School Science Through Inquiry and Argumentation](#) Douglas Llewellyn,2013 For Grades 9 12 this new edition covers assessment questioning techniques to promote learning new approaches to traditional labs and activities that emphasize making claims and citing evidence [Journal of Geological Education](#) ,1974 **Let 'Em Go Pee** Paul Swisher,2018-07-20 Let Em Go Pee Practical Advice for Those Who Dare to Teach is a delightful must read for teachers and aspiring educators Chock full of inspirational stories and commonsense guidelines for building and managing a successful career Let Em Go Pee provides a fail safe recipe for teachers who strive to create a vibrant productive and controlled learning environment Drawing on thirty two years of experience as a secondary education science teacher Paul Swisher shares his list of secret ingredients necessary for achieving and maintaining classroom management communicating effectively with students parents and peers and skillfully blending academic rigor and responsibility with enthusiasm goodwill and fun As the cocreator of Kan Jam and a professionally recognized singer songwriter Swisher adds to his flavorful concoction by mixing in pinches of appetizing spices related to achieving success as an entrepreneur and artist For those who dare to teach this debut offering from the mind of Paul Swisher will undoubtedly provide a delicious bite of sustenance **Course-Based Undergraduate Research** Nancy H. Hensel,2023-07-03 Co published with the Council on Undergraduate Research Undergraduate research has long been recognized as a high impact

practice HIP but has unfortunately been offered only to juniors and seniors and to very few of them often in summer programs This book shows how to engage students in authentic research experiences built into the design of courses in the first two years thus making the experience available to a much greater number of students Research that is embedded in a course especially general education courses addresses the issue of how to expand undergraduate research to all students Research has shown that students who have early experiences in undergraduate research are more likely to pursue further research prior to and after graduation This is also an issue of social justice because it makes the benefits of undergraduate research available to students who must work during the academic year and in the summer It is widely accepted that the skills developed through undergraduate research help prepare students for their future careers The book addresses all aspects of the topic including What are appropriate expectations for research in the first two years How to design appropriate course based research for first and second year students How to mentor a class rather than individual students How students can disseminate the results of their research Possible citizen science projects appropriate for the first and second years Providing additional resources available to support course based research in the first two years Designed for faculty at four year and two year colleges and including examples from the sciences the social sciences and the humanities the strategies and methods described can be adapted to disciplines not specifically mentioned in the book Many faculty are hesitant to engage first and second year students in undergraduate research because they worry students don't know enough to conduct authentic research in their discipline because they worry about the time it will take to develop activities for these students and because they wonder how they can mentor a whole class of students doing research The authors have successfully dealt with these issues and provide examples of how it's done
