Blobitecture John Kevin Waters, 2003 From apartments that evolved through genetic manipulation to womblike office cubicles from a museum with layered and luminous skin to a house with walls that serve as thermodynamic organs from torso shopping bags to jellyfish barstools from blobjects to gbjects to the Superblob Bibitecture takes readers on a riveting tour of one of the most imaginative landscapes in contemporary architecture and industrial design Jacket Experiential Visualization in Architectural Design Media Vincent B. Canizaro, 2023-10-30 Experimental Visualization in Architectural Design Media How It Actually Works is a theoretical practical and interdisciplinary account of the tools used by architects and designers The book focuses on the how these tools influence their ability to envision and craft the future experiential reality of buildings and environments The book is structured around two parallel sets of questions The first concerns the effects of various media on the designer s understanding of their work in experiential terms The media considered include the process of design build standard media such as scale model building hand drawing drafting and extends into the now dominant digitally based design media of BIM digital modeling and emerging VR technologies such as Enscape The second line of questioning seeks patterns of use and other attributes designers deploy in practice to achieve an experiential and meaningful understanding of their work with and through each medium To answer these questions the author provides a detailed assessment of the pros and cons affordance and constraint of each form of mediation and a set of recommendations documenting how experienced designers enhance their visualization skills to support such experiential design This work is interwoven with interdisciplinary consideration of technology perception media studies history and bolstered by the direct experiences of design professionals This book will be of interest to researchers working in the field of architecture and design as well as practising architects designers and students who are seeking guidance on how to effectively design and consider the experience of their future built environments **American Architecture** Leland M.
