Incapacitating Biochemical Weapons Alan Pearson, Marie Chevrier, Mark

Wheelis, 2007-12-12 Incapacitating Biochemical Weapons examines the promise and peril behind weapons based on natural or synthetic biochemical compounds that are meant to cause rapid incapacitation but not to kill An agent has yet to be found that can effectively incapacitate people without risk of death when used in a real world military or law enforcement situation But revolutionary advances in the life sciences and biotechnology are generating new knowledge and potentially greater capabilities for manipulating human consciousness emotions mental functions and behavior These advances coupled with the changing nature of conflict and warfare in the 21st century are generating renewed government interest in incapacitating biochemical weapons Governments international organizations and society as a whole have critical decisions to make about whether and how to pursue the development or conversely the effective prohibition of incapacitating biochemical weapons This book provides a comprehensive survey of the scientific military humanitarian legal and political issues associated with the development and use of incapacitating biochemical weapons The expert contributing authors explore a wide range of

issues pertinent to the topic from science to history to current military interest arms control and international law
Incapacitating Biochemical Weapons Promise or Peril will be of interest to scientists the military and law enforcement
communities policy makers and all who are concerned about the proliferation of such weapons **American Medicine**
