Raymond Curry Erickson, 1957 *The Genera of Lactic Acid Bacteria* W.H.N Holzapfel, B.J. Wood, 2012-12-06

The Lactic Acid Bacteria is planned as a series in a number of volumes and the interest shown in it appears to justify a cautious optimism that a series comprising at least five volumes will appear in the fullness of time This being so I feel that it is desirable to introduce the series by providing a little of the history of the events which culminated in the decision to produce such a series I also wish to indicate the boundaries of the group The Lactic Acid Bacteria as I have defined them for the present purposes and to outline my hopes for future topics in the series

Historical background

lowe my interest in the lactic acid bacteria LAB to the late Dr Cyril Rainbow who introduced me to their fascinating world when he offered me a place with him to work for a PhD on the carbohydrate metabolism of some lactic rods isolated from English beer breweries by himself and others notably Dr Dora Kulka He was particularly interested in their preference for maltose over glucose as a source of carbohydrate for growth expressed in most cases as a more rapid growth on the disaccharide but one isolate would grow only on maltose Eventually we showed that maltose was being utilised by direct fermentation as the older texts called it specifically by the phosphorylase which had first been demonstrated for maltose by Doudoroff and his associates in their work on maltose metabolism by a strain of *Neisseria meningitidis*

I began work on food fermentations when I came to Strathclyde University and I soon found myself involved again with the bacteria which I had not touched since completing my doctoral thesis In 1973 IG Carr C V Cutting and G C Whiting organised the 4th Long Ashton Symposium Lactic Acid Bacteria in Beverages and Food and from my participation in that excellent conference arose a friendship with Geoff Carr The growing importance of these bacteria was subsequently confirmed by the holding a decade later of the first of the Wageningen Conferences on the LAB

Genetics of Lactic Acid Bacteria Brian J.B. Wood, Philip J. Warner, 2003-09-30

Beginning with

an introduction to relevant genetic techniques chapters cover all major groups of LAB including the Bifidobacteria plasmid biology gene transfer phage and sugar metabolism gene expression of various LAB applications for genetically engineered LAB including the emerging field of medical applications and the legal and consumer issues that arise from such applications This resource will set the benchmark for the state of knowledge of LAB genetics and should be of value to food scientists and other researchers working with LAB in its present and future capacities Professionals using lactic acid bacteria LAB for research and or as working organisms whether in food and dairy fermentations or in the exciting new field of clinical delivery agents will find this book invaluable In addition professors teaching under and post graduates in microbiology and postgraduate research students will also find this an essential reference work

Stress Responses of Lactic Acid Bacteria Effie Tsakalidou, Konstantinos Papadimitriou, 2011-09-06

Beginning with the basics of lactic acid bacteria and stress response then working into specific fields of research and current developments *Stress Responses of Lactic Acid Bacteria* will serve as an essential guidebook to researchers in the field industry professionals and advanced students in the area The exploration of stress responses in lactic acid bacteria began in the early 90s and revealed the differences that exist between LAB and the classical model microorganisms A considerable amount of work has been performed on the main genera species of LAB regarding the genes implicated and their actual role and regulation and the mechanisms of stress resistance have also been elucidated Recent genome and transcriptome analyses complement the proteome and genetic information available today and shed a new light on the perception of and the responses to stress by lactic acid bacteria
