

Investigation 3: Inequalities

PACING 2 days

Mathematical Goals

DOMAIN: Expressions and Equations

- Solve word problems leading to one- and two-step inequalities.
- Graph the solutions to one- and two-step inequalities and interpret the solution set in the context of the problem.

Teaching Notes

This investigation focuses on representing situations and solving problems using inequalities. A connection between solving equations and solving inequalities focuses on similar procedures. When students solve one- and two-step inequalities in Problem 3.1, emphasize the similarities with solving linear equations, but be careful to point out that there are some differences as well. Students will explore these differences in Problem 3.2.

Vocabulary

- inequality

Materials

- grid paper

Problem 3.1

Before students begin Problem 3.1, review the inequality symbols and make sure students have an understanding of inequalities. As students answer the Getting Ready questions, ask them to explain their choices of inequality symbols. Discuss other phrases that could be represented as inequalities.

During Problem 3.1 A, ask: Why are you asked to write an inequality rather than an equation? (The problem states that Carlynn wants a television with “at least” a 26-in. screen. So, Carlynn will need to spend an amount equal or greater than the cost of the 26-in. television, \$200.)

During Problem 3.1 B, emphasize the meaning of open and closed circles in the graph of an inequality. Ask: What does “or less” tell you about the graph? (There should be a closed circle at 150 since \$150 is included and the arrow should point to the right.)

Problem 3.2

Before Problem 3.2, during Getting Ready, ask students to explain the steps involved in solving the inequality $3x - 15 \geq 12$, and then compare those steps to solving the equation $3x - 15 = 12$.

During Problem 3.2 A, Part 1, ask: Why is 129 being subtracted from the variable x ? (Carlynn is going to spend \$129 for softball equipment. So it must be subtracted from the amount in the community center’s savings account.)

During Problem 3.2 A, Part 3, ask: Why is the phrase “possible value” used? (There are an infinite number of solutions to the inequality.)
