

CCGPS • 7th Grade Math Content Standards Unpacked

This document is an instructional support tool. It is adapted from documents created by the Partnership for Assessment of Readiness for College and Careers (PARCC), the Ohio Department of Education, the Arizona Department of Education, and the North Carolina Department of Public Instruction for the Common Core State Standards in Mathematics.

Highlighted standards are transition standards for Georgia's implementation of CCGPS in 2012-2013. The highlighted standards are included in the curriculum for two grade levels during the initial year of CCGPS implementation to ensure that students do not have gaps in their knowledge base. In 2013-2014 and subsequent years, the highlighted standards will not be taught at this grade level because students will already have addressed these standards the previous year.

What is the purpose of this document? To increase student achievement by ensuring educators understand specifically what the

new standards mean a student must know, understand and be able to do.

What is in the document? Descriptions of what each standard means a student will know, understand, and be able to do. The "unpacking" of the standards done in this document is an effort to answer a simple question "What does this standard mean that a student must know and be able to do?" and to ensure the description is helpful, specific and comprehensive for educators.

How do I send feedback? The explanations and examples in this document are intended to be helpful and specific. As this document is used, however, teachers and educators will find ways in which the unpacking can be improved and made more useful. Please send feedback to feedback@7-12.ga.us. Your input will be used to refine the unpacking of the standards.

Just want the standards alone? You can find the CCGPS standards for your grade band at www.georgiastandards.org.
