Each chapter contains a Study Guide section and a Lab Exercises section. Keep all your completed work on hand in this book to study from later or take advantage of the perforated pages to tear out and hand in specific material for homework assignments. Over 200 exercises in this book help you learn the concepts and configurations crucial to your success as a CCNA exam candidate. Each chapter is slightly different and includes some or all of the following types of exercises: vocabulary matching and completion, skill building activities, and scenarios. Configuration scenarios, concept questions, journal entries, and internet research. You review all the commands covered in the chapter. The book includes all 55 labs from the online course with an additional 15 labs in which you can apply your knowledge about the technologies and concepts introduced. You will get ample opportunity for hands-on practice in three different types of labs: Curriculum Labs, Comprehensive Labs, and Challenge Labs.

Curriculum Labs are step-by-step exercises designed to introduce you to new concepts. Presenting you with detailed instructions and sometimes additional explanations for completing the lab, Curriculum Labs come directly from the CCNA 2 online course.
