Pittsburgh's Greatest Athletes David Finoli, 2019-06-24 Author and sports historian David Finoli's inside look at the 50 greatest male and female athletes in Pittsburgh history Greatness in sport is both undefinable and immediately recognizable Though it is rare Western Pennsylvania has been graced with a long history of athletes who embody the essence of greatness They have proudly represented the region in sports such as boxing golf and track carried their collegiate teams to victory and worn the black and gold of the Steelers Pirates and Penguins Pittsburghers still recall how Mario Lemieux glided effortlessly through an opposing defense before befuddling the goalie or Arnold Palmer's unique swing that made the everyday duffer feel like he was one of them Fans debate whether Terry Bradshaw or Ben Roethlisberger is the better quarterback and what the legacy of Barry Bonds is while keeping Roberto Clemente among their most cherished icons Take a deep dive into all of that and more and re-discover the best of the best in Pittsburgh sports history Innocent Experiments Rebecca Onion, 2016-10-04 From the 1950s to the digital age Americans have pushed their children to live science-minded lives cementing scientific discovery and youthful curiosity as inseparable ideals In this multifaceted work historian Rebecca Onion examines the rise of informal children's science education in the twentieth century from the proliferation of home chemistry sets after World War I to the century-long boom in child-centered science museums Onion looks at how the United States has increasingly focused its energies over the last century into producing young scientists outside of the classroom She shows that although Americans profess to believe that success in the sciences is synonymous with good citizenship this idea is deeply complicated in an era when scientific data is hotly contested and many Americans have a conflicted view of science itself These contradictions Onion explains can be understood by examining the histories of popular science and the development of ideas about American childhood She shows how the idealized concept of science has moved through the public consciousness and how the drive to make child scientists has deeply influenced American culture *The Tragedy of American Science* Clifford D. Conner, 2020-05-05 A look at the destructive history of science for profit including its toll on the US pandemic response by the author of *A People's History of Science* Despite a facade of brilliant technological advances American science has led humanity to the brink of interrelated disasters In *The Tragedy of American Science* historian of science Clifford D. Conner describes the dual processes by which this history has unfolded since the Second World War addressing the corporatization and the militarization of science in the US He examines the role of private profit considerations in determining the direction of scientific inquiry and the ways those considerations have dangerously undermined the integrity of sciences impacting food water air medicine and the climate In addition he explores the relationship between scientific industries and the US military discussing the innumerable financial and human scientific resources that have been diverted from other critical areas in order to further military aggrandizement and technological development While the underlying problems may appear intractable Conner compellingly argues that replacing the current

science for profit system with a science for human needs system is not an impossible utopian dream and the first step to a better future is grappling with the mistakes of the past

**The Schenley Experiment** Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools

Morrow, Laurie Cantileno, 2022-09-01 Female scientists technologists engineers and mathematicians worldwide are making historic contributions to their fields The modern workforce is closer to gender equal than it has ever been and many efforts are in place to support further progress The Internet of Women provides an exciting look at personal narratives and case studies of female leaders and cultural shifts around the globe that illustrate this promising trend From the United Nations emphasis on girls and technology education in the SDGs Sustainable Development Goals to the increased female labor force in Zambia a policy change that was inspired by the MDGs UN Millennial Development Goals The Internet of Women captures stunning examples of progress from around the world and men working hand in hand with women advocating for cultural change Scholars and practitioners lament the lack of women leading and working in leading organizations in the technology industry Gender equality and female participation in the tech field is critical to both developing and developed economies nevertheless this gap remains a global phenomenon The lack of female leadership is particularly extreme at the highest echelons of leading technology organizations Few publicly traded tech companies have female CEOs in fact most nations have zero female leadership in the tech industry This gap does indicate a slow pace of progress for gender equality in tech employment Women's pay still lags nearly a decade behind according to the World Economic Forum meaning that women's

on average pay today is the equivalent to that of similarly qualified and similarly employed men in 2006 Without significant progress the current rate of change will not lead to parity for 118 years according to the World Economic Forum WEF However there s significant work being done to shift this tide Take for instance Michelle Lee the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office USPTO reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired to create an IP badge that exposes young women to the process of invention Social entrepreneur investor and Malala Fund co founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe And Elizabeth Isele a senior fellow in Social Innovation at Babson College shares her research on women and ageism saying we need to retire the word retirement The book is divided into six parts each with unique areas of focus Millennials Leading Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology Men and Women Empowering One Another Bold Leadership Women Changing the Culture of Investment and Entrepreneurship Educating for the 21st Century Breaking the Glass Ceiling A Generation of Women Forging into Technology Leadership Emerging Fields of Technology The Internet of Women gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries Stories range from an entrepreneur in Dubai partnering with private and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator The book is intended for corporations academic institutions the private sector government agencies gender experts and the general public and its key benefit is to let the reader understand a path towards implementing diversity overall globally It also showcases the strategies tools and tactical execution on how create cultural change in all parts of the world
