[illegible]

These issues arise with any program that involves the use of a computer. The computer is a tool, and like any tool, it can be used in a variety of ways. The computer can be used to create a program that is designed to solve a specific problem, or it can be used to create a program that is designed to solve a variety of problems. The computer can be used to create a program that is designed to solve a specific problem, or it can be used to create a program that is designed to solve a variety of problems. The computer can be used to create a program that is designed to solve a specific problem, or it can be used to create a program that is designed to solve a variety of problems.

¹ The authors are grateful to the National Science Foundation for support of this work.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.
