Harold S. Wechsler, 2017-09-29 In *The Qualified Student* Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions

White, 2017-01-01 In *Constructing Policy Change* Linda A White examines the expansion of early childhood education and care ECEC policies and programs in liberal welfare states including Australia Canada New Zealand the UK and the USA In the first part of the book the author investigates the sources of policy ideas that triggered ECEC changes in various national contexts This is followed by a close analysis of cross national variation in the implementation of ECEC policy in Canada and the USA White argues that the primary mechanisms for policy change are

grounded in policy investment logics as well as cultural logics that is shifts in public sentiments and government beliefs about the value of ECEC policies and programs are rooted in both evidence based arguments and in principled beliefs about the policy A rich nuanced examination of the reasons motivating ECEC policy expansion and adoption in different countries Constructing Policy Change is a corrective to the comparative welfare state literature that focuses on political interest alone

Profiles of Florida ,2005 **Profiles of Florida** David Garoogian,2005 **The Cost of Class Size Reduction** Robert E. Reichardt,2000 Class size reduction CSR in California was a popular rapidly implemented reform that improved student performance This dissertation provides information to state level policy makers that will help them avoid two implementation problems seen in California s CSR implementation The first problem was with flat per student reimbursement scheme did not adequately cover costs in districts with larger pre CSR class sizes or smaller schools To help policy makers understand the relationship between existing conditions at schools policy choices and costs four simple rules of thumb were created through analysis of a simulation of CSR in seven Florida school districts At a classroom cost of 53 000 the rules of thumb per student cost for CSR is a 435 for reduction to 20 double for reduction to 17 and triple for reduction to 15 when existing class size is 24 These rules of thumb and three other reimbursement strategies are evaluated for their ability to adequately estimate reimbursements for the cost of CSR The strategy used in California of a flat per student reimbursement was the least efficient Strategies using district information on costs class sizes and enrollments are adequate for reimbursing districts The

rules of thumb was the most robust strategy for reimbursing schools A second problem seen in California was a decrease in the qualification level of the kindergarten through third teacher workforce The largest decrease were in schools with higher concentrations of low income or minority students Modeling the flow of K 3 teachers during the first year of CSR shows within district transfers create more vacancies in schools with more minority students Vacancies were then more likely to be filled with unqualified teachers Potential policy responses to this problem are to not fill classrooms created by CSR with transfer teachers and to provide incentives for teachers to remain in schools that are difficult to staff **ERS Spectrum**,1989 **State English Standards** Sandra Stotsky,1997 Education State Rankings 2008-2009 CQ Press,2008-09-15 Compares the 50 states in hundreds of preK 12 education categories Categories include reading and math scores teachers salaries graduation rates per pupil spending special education and class size **Journal of the Senate, State of Florida** Florida.
