Amienyi, 2016-12-05 This book addresses the negative impact of social cleavages on the development of many African countries It proposes new ideas on how the development crisis in Africa may be addressed by conceptualizing the underlying problem as a communication issue In contrast to the frequent neglect of this key factor this book provides a provocative discussion of how communication strategies can help to promote national integration and social economic and political development It argues that the activities associated with the communication of national integration must be seen as an all encompassing task that transcends official speeches in attempts to persuade a disparate population to cultivate national consciousness Such activities must encompass efforts to persuade leaders to eliminate policies that seek to promote spatial dislocation and cross cultural interaction and to arouse the audience to pay closer attention to integrative messages disseminated through the mass media *Cross-cultural Deception in Polish and American English in Computer-Mediated Communication* Anna Kuzio, 2018-09-30 Deception is

omnipresent throughout the evolution of life inseparable from the development of various modes of communication By effectively manipulating the behavior of others apparently by taking advantage of recipients own rules communicators are able to gain an advantage while negotiating meaning in a cross cultural environment Even though much research related to deceptive behavior and its detection has been conducted in recent years little of it has concentrated on deception outside of a North American context This monograph addresses that lacuna Consistently most research on deception has examined face to face verbal communication and ignored computer mediated communication In response this book also provides detailed insights into how computer mediated communication and adopted cultural values affect deceptive communication and deception detection across cultures namely in Poland and the USA It focuses on discussing theories about why cues to deception exist theories specific to verbal cues to deception and theories about computer mediation in communication The book also proposes a research model postulating relationships between computer mediated communication media cue detection media familiarity national culture espoused cultural values veracity judgment success and deceptive communicative behavior
