1. Shown below are concentric solid and dashed circles, each different in radius by 1 cm. Consider the circular pattern of a top view of water waves, where the solid circles are crests and the dashed circles are troughs.
 - a. Draw another set of the same concentric circles with a compass. Choose any part of the paper for your center (except the present central point). Let the circles run off the edge of the paper.
 - b. Find where a dashed line crosses a solid line and draw a large dot at the intersection. Do this for ALL places where a solid and dashed line intersect.
 - c. With a wide felt marker, connect the dots with smooth lines. These nodal lines lie in regions where the waves have canceled — where the crest of one wave overlaps the trough of another (see Figures 25.11 and 31.12 in the textbook).
