Concept Review Food And Agriculture:

Gender, Nutrition, and the Human Right to Adequate Food Anne C. Bellows, Flavio L.S. Valente, Stefanie Lemke, María Daniela Núñez Burbano de Lara, 2015-12-07 This book introduces the human right to adequate food and nutrition as evolving concept and identifies two structural disconnects fueling food insecurity for a billion people and disproportionately affecting women children and rural food producers the separation of women s rights from their right to adequate food and nutrition and the fragmented attention to food as commodity and the medicalization of nutritional health Three conditions arising from these disconnects are discussed structural violence and discrimination frustrating the realization of women s human rights as well as their private and public contributions to food and nutrition security for all many women s experience of their and their children s simultaneously independent and intertwined subjectivities during pregnancy and breastfeeding being poorly understood in human rights law and abused by poorly regulated food and nutrition industry marketing practices and the neoliberal economic system s interference both with the autonomy and self determination of women and their communities and with the strengthening of sustainable diets based on democratically governed local food systems The book calls for a social movement led reconceptualization of the right to adequate food toward incorporating gender women s rights and nutrition based on the food sovereignty framework

Feeding Britain Tim Lang, 2020-03-26 How does Britain get its food Why is our current system at breaking point How can we fix it before it is too late British food has changed remarkably in the last half century As we have become wealthier and more discerning our food has Europeanized pizza is children s favourite food and internationalized we eat the world s cuisines yet our food culture remains fragmented a mix of mass ultra processed substances alongside food as varied and good as anywhere else on the planet This book takes stock of the UK food system where it comes from what we eat its impact fragilities and strengths It is a book on the politics of food It argues that the Brexit vote will force us to review our food system Such an opportunity is sorely needed After a brief frenzy of concern following the financial shock of 2008 the UK government has slumped once more into a vague hope that the food system will keep going on as before Food they said just required a burst of agri technology and more exports to pay for our massive imports Feeding Britain argues that this and other approaches are short sighted against the public interest and possibly even strategic folly Setting a new course for UK food is no easy task but it is a process this book urges that needs to begin now Tim Lang has performed a public service Simon Jenkins Sunday Times
