1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- a. The net force on the crate is (zero) (greater than zero).
b. Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- a. The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
b. The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction f is (less than) (equal to) (greater than) P .
b. Constant velocity means acceleration is (zero) (greater than zero).
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
6. If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

Cyclic Repulsive Multiverse (RCM) Antonio Carlos Pinto, 2025-07-07 This work entitled The Cyclic Repulsive Multiverse Model RCM Modelo do Multiverso Cíclico Repulsivo RCM is not just a theoretical formulation It is the enunciation of a system of reality It is a carefully designed conceptual framework to challenge the current limits of cosmology by proposing an alternative reinterpretation of the genesis evolution and transition of universes not as isolated occurrences but as cyclical expressions of a gravitational mechanism not yet fully understood The RCM does not emerge as an addition to already established theories but as an epistemological shift It inaugurates a new paradigmatic horizon where the forces governing the cosmos are not limited to traditional attractive gravity but coexist in dynamic equilibrium with a repulsive gravity of a radiant nature This force until now neglected or poorly understood is here elevated to the status of ontogenic engine of the cosmos capable of underpinning not only the acceleration of the expansion of the universe but also the interdimensional mechanisms that govern the gestation and ejection of entire realities At the heart of this model is the proposition that the observable universe did not emerge ex nihilo nor as an arbitrary product of a quantum vacuum but was expelled from an originating event of supra universal scale the Primordial Repulsive Explosion PRE This is not conceived as a destructive explosion but as an act of cosmic overflow a matrixial gesture in which a predecessor universe collapses not in the silence of extinction but in the potency of creation giving rise to a Daughter Universe through the repulsive ejection of inverted gravitational energy The structure of the RCM is based on entities such as the Super Cosmic White Hole conceived not as a metaphor but as a physical conceptual structure of inter universal transition This entity represents the matrix through which the new cosmos is gestated and projected assuming the role that the Big Bang until then occupied in an insufficiently explained way In the RCM the Big Bang is not the origin but the consequence not the beginning of everything but the continuity of a larger cyclical eternal flow Divided into 10 parts and structured into 33 chapters this work follows a rigorous logical cosmological progression starting with the foundations of classical physics Newton Einstein and advancing through contemporary discussions on dark matter dark energy primordial white holes emergent gravity Verlinde multiverse Hawking until culminating in the systematic exposition of inverse gravity a central principle proposed by Antonio Carlos Pinto Each section of this treatise sustains an internal interdependence articulating physical ideas theoretical conjectures observational consequences and philosophical implications RCM theory is rooted in sources of scientific legitimacy but its vocation is transgressive it rejects methodological dogmas and the limits imposed on rational imagination Rather than simply solving equations RCM seeks to reformulate questions This is not a book to be read only with the eyes of a technician or an academic It is a book to be read with the spirit of those who dare to think about the

invisible to name what does not yet have a language and to model what until now was only cosmic intuition It is addressed to researchers and independent scholars philosophers of science and to all who recognize that genuine knowledge does not flourish where there is conformity but where there is restlessness What is offered here is not a theory of everything but rather a model of cosmological freedom a system where the universe is not absolute but one among others where time is a curve between gravitational pulsations where being far from being confined to a single world propagates itself across multiple planes realities and rhythms The RCM is in essence an ontological act a call to reconnect with the first causes A philosophical return to the arch where science and metaphysics intertwine in the search for a cosmological logos that can account for the vastness that we intuit but do not yet understand Let this work therefore not be taken merely as speculation But as an inaugural gesture of thought a beginning of a dialogue between the finite mind and the infinite that surrounds it
