Chapter 28. Reflection and Refraction

Pool Room Optics

The law of reflection for optics is useful in playing pool. A ball bouncing off the bank of a pool table behaves like a photon reflecting off a mirror. As this sketch shows, angles become straight lines with the help of mirrors. The diagram shows a top view of this, with a flattened "mirrored" region. Note that the angled path on the table appears as a straight line (dashed) in the mirrored region.

1. Consider a one-bank shot (one reflection) from the ball to the north bank and then into side pocket E.

Mirrors, actual or imagined, improve your pool playing!

- Use the mirror method to construct a straight-line path to mirrored E'. Then construct the actual path to E.
- Without using off-center strokes or other tricks, can a one-bank shot off the north bank put the ball in corner pocket F? _____ Show why or why not using the diagram.

College Physics: Volume 1 Roger Freedman, David L. Tauck, Philip R. Kesten, 2013-07-12 College Physics brings physics to life through a unique approach to the algebra level introductory physics course. Its winning combination of annotated art carefully integrated life sciences applications and strong problem solving and conceptual understanding pedagogy makes this the best text available for helping students master the physics they need to know for their future careers. Using innovative visual cues to break down physics concepts and sequences in numbered equations and figures, College Physics leads students to develop the crucial conceptual understanding they need to be successful in the course. Carefully crafted to support students new to college level physics, pedagogical features, chapter goals, Take Home Messages, Got the Concept, Watch Out, guide students to becoming adept problem solvers. By incorporating a rigorous presentation of the fundamentals of algebra based introductory physics with formative physiology, biomedical, and life science topics, students learn to connect physics to living systems. The ultimate goal is for students to have both a solid foundation in physics and to develop a deeper appreciation for why physics is important to their future work in the life sciences.
