Practice Page****6-1****Friction**

1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- The net force on the crate is (zero) (greater than zero).
- Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
- The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- Friction f is (less than) (equal to) (greater than) P .
- Constant velocity means acceleration is (zero) (greater than zero).
- The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- The net force on the crate is (less than) (equal to) (greater than) zero.
- The net force acts toward the right, so acceleration acts toward the (left) (right).

- If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
- If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
- If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
- If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

Proceedings, 1976 *Gilles Deleuze and the Question of Philosophy* Philip Goodchild, 1996 In this book author Philip Goodchild tries to uncover the image of thought used by the French philosopher Gilles Deleuze He does so by focusing on the question What is philosophy posed implicitly throughout Deleuze's publications Goodchild traces the development of a highly sophisticated coherent and rigorous practice of thought that underlies Deleuze's apparently flamboyant and anarchic discourse This question of philosophy is posed in the context of an awareness of the historical social and cultural conditioning of a plurality of rationalities that bring into question the value of the philosophical enterprise as a whole Deleuze meets this problem by identifying something unthought and unthinkable that conditions the way in which people do in fact think and by directing philosophy toward this as its transcendental field Philosophy is no longer seen as an attempt to ascertain evaluate criticize or interpret knowledge or meaning but is seen as an exercise in creating concepts for use in the practical problems of life Ultimately Deleuze's philosophy constructs an affirmative and interactive kind of social relation which was embodied in his own intellectual relationship with Felix Guattari and which can form the basis for the organization of a new kind of society In conclusion this book examines Deleuze's deepest metaphysical presuppositions and finds that while a certain kind of materialism pervades Deleuze's thought the practice of that thought also presupposes a kind of metaphysics of creative awareness where planes lines and crystals are folded onto each other into a fractal of philosophy By rethinking the question of philosophy in Deleuze's thought one can be led to open up a new meaning of life in terms of the Transcendence of this awareness to that which it conditions The result is an escape from the dead ends of postmodern thought
