Drawing Conclusions

Drawing conclusions allows someone to be specific with every detail because each serves as evidence for a particular idea. Use the examples below and come up with a conclusion for each one.

1. Amalia jogs every morning as much as she can.
2. Amalia makes sure that she gets at least 8 hours of sleep.
3. She does not eat fatty food and only consumes vegetables and other healthy alternatives.

1. The flow of the event was a bit confusing.
2. The guests did not know at first where they should sit.
3. The food was not appetizing in terms of appearance and arrangement.

1. Jake is an employee who used to excel at his job.
2. Recently, he has been coming to the office late and usually looks unmotivated.
3. He did not submit his work and does not seem to care.

Reinventing STEM in Early Childhood Education Eugene Geist, 2025-05-09 Teaching STEM to young children is about more than helping them learn their numbers and facts. It is an important and complex process that to be effective should honor the way children's brains are developing. This book outlines how early childhood educators can best support young children's STEM journeys as children naturally take in information about their environment, synthesize it, and grow in the process. This comprehensive text details different theories of learning, research on how young brains develop, practical information on preparing your environment and yourself for teaching STEM to children, guidance for supporting diverse populations of students, and developmental guidelines, sample standards, resources, and lesson plans. Organized chronologically, the book connects relevant STEM topics with each developmental age range and outlines common school standards for each grade. *Reinventing STEM in Early Childhood Education* is meant to be a core text for preservice teachers in math and science methods courses and is also important reading for teacher educators and professional development programs.

Exemplary Science in Grades 5-8 Robert Eugene Yager, 2006 This volume is the third in NSTA's Exemplary Science monograph series which provides the results of an unprecedented national search to assess how well the Standards vision has been realized nine years after the National Science Education Standards were released.

Research Anthology on Computational Thinking, Programming, and Robotics in the Classroom Management Association, Information Resources, 2021-07-16 The education system is constantly growing and developing as more ways to teach and learn are implemented into the classroom. Recently, there has been a growing interest in teaching computational thinking with schools all over the world, introducing it to the curriculum due to its ability to allow students to become proficient at problem solving using logic, an essential life skill. In order to provide the best education possible, it is imperative that computational thinking strategies along with programming skills and the use of robotics in the classroom be implemented in order for students to achieve maximum thought processing skills and computer competencies. *The Research Anthology on Computational Thinking, Programming, and Robotics in the Classroom* is an all-encompassing reference book that discusses how computational thinking, programming, and robotics can be used in education as well as the benefits and difficulties of implementing these elements into the classroom. The book includes strategies for preparing educators to teach computational thinking in the classroom as well as design techniques for incorporating these practices into various levels of school curriculum and within a variety of subjects. Covering topics ranging from decomposition to robot learning, this book is ideal for educators, computer scientists, administrators, academicians, students, and anyone interested in learning more about how computational thinking, programming, and robotics can change the current education system.
