1. Which conditions must be met for a reaction to take place?

- I. Reactants collide with sufficient energy.
- II. Reactants collide with correct orientation.
- III. Reactants must be in the same state.

- ☒ A. I and II only
- B. I and III only
- C. II and III only
- D. I, II and III

not necessary

2. Curves I and II represent samples of the same gas at a constant pressure but at different temperatures. The areas under curves I and II are equal. What does curve II represent?

- A. Curve II is at the lower temperature and there are less molecules in the sample.
- B. Curve II is at the lower temperature and there are the same number of molecules in the samples.
- C. Curve II is at the higher temperature and there are more molecules in the sample.
- ☒ D. Curve II is at the higher temperature and there are the same number of molecules in the samples.

3. Graph 1 shows a plot of volume of $\text{CO}_2(\text{g})$ against time for the reaction of $\text{CaCO}_3(\text{s})$ with $1.00 \text{ mol dm}^{-3} \text{ HCl}(\text{aq})$. The acid is the limiting reagent and entirely covers the lumps of $\text{CaCO}_3(\text{s})$. Which set of conditions is most likely to give the data plotted in graph 2 when the same mass of $\text{CaCO}_3(\text{s})$ is reacted with the same volume of $\text{HCl}(\text{aq})$ at the same temperature?

the same amount of product

the same concentration

limiting reagent

the same mass of CaCO_3

Conceptual Multiple Choice Refraction Questions

Zacharoula Smyrniou

Conceptual Multiple Choice Refraction Questions:

Concepts of Modern Engineering Physics A S Vasudeva, 2007 Although Concepts of Modern Physics was the first book covering the syllabi of Punjab Technical University Jalandhar and it was accepted wholeheartedly by students and teachers alike. However, due to the repeated changes of syllabi of P T U as it being a new university, the book had to be revised and some of the chapters became redundant as these were replaced by new topics. Though the book was revised with the additional chapters, the discarded chapters also formed the part of the book. Recent Advances in Science and Technology Education, Ranging from Modern Pedagogies to Neuroeducation and Assessment Zacharoula Smyrnioti, 2016-03-08 Science and technology education research influenced by inquiry-based thinking not only concentrates on the teaching of scientific concepts and addressing any misconceptions that learners may hold but also emphasizes the ways in which students learn and seeks avenues to achieve better learning through creativity. New developments in science and technology education rely on a wide variety of methods borrowed from various fields of science such as computer science, cognitive science, sociology, and neurosciences. This book presents papers from the first international conference on New Developments in Science and Technology Education that was structured around seven main thematic axes: namely, modern pedagogies in science and technology education, new technologies in science and technology education, assessment in science and technology education, teaching and learning in the light of inquiry learning methods, neuroscience and science education, conceptual understanding and conceptual change in science, and interest, attitude, and motivation in science. It explores the beneficial impact of pedagogically updated practices and approaches in the teaching of science concepts and elaborates on future challenges and emerging issues that concern science and technology education. By pointing out new research directions, the volume will inform educational practices and bridge the gap between research and practice, providing new information, ideas, and perspectives. It will also promote discussions and networking among scientists and stakeholders from worldwide scientific fields such as researchers, professors, students, and companies developing educational software. Concepts of Electromagnetic Theory K. Manta, Raj Kumar Singh, J. N. Prasad, 2021-10-30 Concepts of Electromagnetic Theory is a useful resource on the electromagnetic theory for undergraduate students of science and various technical streams. The book covers a wide range of topics: viz. electrical field and potential, electrostatic boundary value problem, electrostatic field in dielectric medium, magnetostatics, magnetic fields in matter, Maxwell's equations, electromagnetic waves, polarization of electromagnetic waves, and optical fibre. Understanding of electromagnetic theory is also required in the electromagnetic braking, coffee ring effect, Faraday's cage, and communication systems. Difficult mathematical steps have been simplified by including all the steps of calculation using easy and comprehensible formulae and equations. Figures and illustrations are included to make the understanding of concepts, notations, and representation easy and simple. Salient features: Dedicated mathematical preview for better understanding. Alfredo A. Sadun,James D. Brandt,2012-12-06 This manual is written to assist the student of optics or the ophthalmology resident in reviewing optics It is particularly suitable as an optics Board review However it was not intended to accomplish the far greater task of encompassing the entire field of geometric optics or even of teaching all that the ophthalmologist needs to know of visual optics or refraction This manual represents the distillation of lecture notes for an optics Board review course given at the Massachusetts Eye and Ear Infirmary Harvard Medical School for the last seven years This optics lecture series which has also been given at Boston University and at the University of Southern California has traditionally taken place over a week with three two hour sessions Obviously this six hour lecture series could not possibly cover the entire field of optics for clinicians This optics Board review lecture series has customarily involved a few problems at the end of each lecture which then provided a basis for a review that was given at the beginning of the next lecture These problems have always proven a useful means of self testing as well as practice for becoming more comfortable and facile with the concepts involved The problems have not been taken from the American Board of Ophthalmology test materials either written or oral However they incorporate many of the concepts and computational manipulations which are frequently tested on the ophthalmology boards **Concepts and Challenges in Science New York Proficiency Review Book** Globe Fearon,2000-11
