1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight  $W$  and normal force  $n$ .

- a. The net force on the crate is (zero) (greater than zero).  
b. Evidence for this is no acceleration.

2. A slight pull  $P$  is exerted on the crate, not enough to move it.

- a. The force of friction  $f$  acting on the crate is (less than) (equal to) (greater than)  $P$ .  
b. The net force on the crate is (zero) (greater than zero).

3. Pull  $P$  is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction  $f$  is (less than) (equal to) (greater than)  $P$ .  
b. Constant velocity means acceleration is (zero) (greater than zero).  
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull  $P$  is further increased and is now greater than friction  $f$ .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.  
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force  $P$  is 150 N and the crate doesn't move, what is the magnitude of  $f$ ? 150 N  
6. If the pulling force  $P$  is 200 N and the crate doesn't move, what is the magnitude of  $f$ ? 200 N  
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N  
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s<sup>2</sup> 300 N? 1 m/s<sup>2</sup> 500 N? 5 m/s<sup>2</sup>

*Student Solutions Manual for Tipler and Mosca's Physics for Scientists and Engineers, Sixth Edition: Chapters 1-20* Todd Ruskell, 2008      **Problems in the Foundations of Physics** M. Bunge, 2013-03-08 This is a collection of technical papers in the foundations and the philosophy of physics with emphasis on the former and philosophy in their narrow technical senses but it construes physics *latu sensu* as including all the sciences of nonliving systems All eleven papers constituting this volume were written for it The problems tackled in this book concern certain basic concepts hypotheses theories and research programmes in physical science Some of these problems are topical others new but they are all fundamental and the subject of research and controversy Consequently this volume is expected to serve those students teachers and researchers who enjoy learning teaching discussing or doing theoretical physics It is addressed to the novice rather than to the expert It is expected to attract the theoretician in search for new basic ideas the teacher eager to perfect his understanding of physical theory and transmit his own zeal and his own doubts as well as the student anxious to get down to essentials This book may also interest the mathematician for whom physics offers a challenge or a good pretext Finally it should get the attention of the philosopher of science aware of the advantages of philosophizing on foundations research problems rather than on the popularization of some results of research There are at least two reasons for valuing foundations research      College Physics Essentials, Eighth Edition Jerry D. Wilson, Anthony J. Buffa, Bo Lou, 2019-11-15 This new edition of College Physics Essentials provides a streamlined update of a major textbook for algebra based physics This is the first volume and covers topics such as mechanics heat and thermodynamics The second volume available separately covers electricity atomic nuclear and quantum physics The authors provide emphasis on worked examples together with expanded problem sets that build from conceptual understanding to numerical solutions and real world applications to increase reader engagement Including over 900 images throughout the two volumes this textbook is highly recommended for students seeking a basic understanding of key physics concepts and how to apply them to real problems      College Physics Essentials, Eighth Edition (Two-Volume Set) Jerry D. relatively late addition to a series of German societies of science and medicine that began with the Deutsche Gesellschaft für Geschichte der Medizin und der Naturwissenschaften founded in 1910 by Leipzig University's Karl Sudhoff 1853-1938 who wrote "We want to establish a German society in order to gather German speaking historians together in our special disciplines so that they form the core of an international society." Yet Sudhoff at this time of burgeoning academic internationalism was quite willing to accommodate the wishes of a number of founding members and drop the word German in the title of the Society and have it merge with an international society. The founding and naming of the Society at that time derived from a specific set of historical circumstances and the same was true some 80 years later when in 1991 in the wake of German reunification the Deutsche Gesellschaft für Geschichte und Theorie der Biologie was founded. From the start the Society has been committed to bringing studies in the history and philosophy of biology to a wide audience using for this purpose its *Jahrbuch für Geschichte und Theorie der Biologie*. Parallel to the *Jahrbuch* the *Verhandlungen zur Geschichte und Theorie der Biologie* has become the by now traditional medium for the publication of papers delivered at the Society's annual meetings. In 2005 the *Jahrbuch* was renamed *Annals of the History and Philosophy of Biology* reflecting the Society's internationalist aspirations in addressing comparative biology as a subject of historical and philosophical studies.
