Chapter 23 Electric Current

Circuit Resistance

Figure what the resistances are, then show their values in the blanks to the left of each lamp.

All circuits below have the same lamp A with resistance of $6\ \Omega$ and the same 12-volt battery with negligible resistance. The unknown resistances of lamps B through L are such that the current in lamp A remains 1 ampere. Fill in the blanks.

Circuit a: How much current flows through the battery? 1 A.

Circuit b: Assume lamps C and D are identical. Current through lamp D is 0.5 A.

Circuit c: Identical lamps E and F replace lamp D. Current through lamp C is 0.5 A.

Circuit d: Lamps G and H replace lamps E and F, and the resistance of lamp G is twice that of lamp H. Current through lamp H is 0.5 A.

Handy rule: For a pair of resistors in parallel:
Equivalent resistance = $\frac{\text{product of resistances}}{\text{sum of resistances}}$

Circuit e: Identical lamps K and L replace lamp H. Current through lamp L is 0.25 A.

The equivalent resistance of a circuit is the value of a single resistor that will replace all the resistors of the circuit to produce the same load on the battery. How do the equivalent resistances of the circuits a through e compare?

All are the same

Fundamentals of Physics, , Chapters 23 to 49 David Halliday, Robert Resnick, Jearl Walker, 1993-09-13 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book without typos from the publisher. Not indexed. Not illustrated. 1888 edition. Excerpt: apparel and sought and obtained employment as a teamster in the quartermasters department. Her features were very large and so coarse and masculine was her general appearance that she would readily have passed as a man and in her case the deception was no doubt easily practiced. Next day she was caught and proved to be a rather prepossessing young woman and though necessarily bronzed and hardened by exposure I doubt if even with these marks of campaigning she could have deceived as readily as did her companion. How the two got acquainted I never learned and though they had joined the army independently of each other yet an intimacy had sprung up between them long before the mishaps of the foraging expedition. They both were forwarded to army headquarters and when provided with clothing suited to their sex sent back to Nashville and thence beyond our lines to Louisville. On January 9 by an order from the War Department the Army of the Cumberland had been divided into three corps designated the Fourteenth, Twentieth and Twenty first. This order did not alter the composition of the former grand divisions nor change the commanders but the new nomenclature was a decided improvement over the clumsy designations Right Wing, Centre and Left Wing which were well calculated to lead to confusion. Sometimes McCook's wing became the Twentieth Corps and my division continued of the same organization and held the same number as formerly the Third Division Twentieth Corps. My first brigade was now commanded by Brigadier General William H Lytle the second by Colonel Bernard Laiboldt and the third by Colonel Luther P Bradley. On the 4th of March I was directed to move in light marching order toward Franklin and
