1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight W and normal force n .

- a. The net force on the crate is (zero) (greater than zero).
b. Evidence for this is no acceleration.

2. A slight pull P is exerted on the crate, not enough to move it.

- a. The force of friction f acting on the crate is (less than) (equal to) (greater than) P .
b. The net force on the crate is (zero) (greater than zero).

3. Pull P is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction f is (less than) (equal to) (greater than) P .
b. Constant velocity means acceleration is (zero) (greater than zero).
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull P is further increased and is now greater than friction f .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force P is 150 N and the crate doesn't move, what is the magnitude of f ? 150 N
6. If the pulling force P is 200 N and the crate doesn't move, what is the magnitude of f ? 200 N
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s² 300 N? 1 m/s² 500 N? 5 m/s²

The Project Physics Course: Reader Harvard Project Physics,1970 **Lecture Notes on Intermediate Heat** Leonard Benedict Loeb,John Scott Campbell,1938 **Physics, Uspekhi** ,1997 **Revitalizing Undergraduate Science** Sheila Tobias,1992 This book explains why so few efforts at reforming science education are successful and why it is that the 300 studies on the subject published over the past decade have done little more than add to a growing body of literature The book describes programs which are successful in terms of faculty accomplishments students graduated and entering advanced study or professional workplace and showing evidence of high morale among both faculty and undergraduates Common elements in many of these programs are abandonment of an almost exclusive emphasis on problem solving and modification of the lecture format to permit teaching of underlying concepts Other variations in traditional introductory physics and chemistry courses are aimed at persuading those simply fulfilling graduation requirements to major in science at bringing minority students into the fold or at combining physics or various sub fields of chemistry in different ways to promote better understanding Harvard s chem phys is provided as an example of such a combination but also as a case study of how innovation can be stymied by a lack of university wide change The author uses methods of ethnography in reporting what makes individual programs interesting what their faculty are doing and what program participants are thinking PR
