Distance vs. Displacement

- Distance is the total length of travel
 - Measured in meters
- Displacement is the change in position with direction
 - Measured in meters
 - Displacement = final position - initial position
 - $\Delta X = X_f - X_i$

Speed and Velocity

- Average Speed is the total distance over time
 - o Measured in meters per second (m/s)
- Average Velocity is the displacement over total time
 - o Measured in meters per second (m/s)
 - o $V_{avg} = \Delta X / \Delta t = (X_f - X_i) / (t_f - t_i)$
- Instantaneous Velocity is the displacement over time
 - o The velocity at a certain instant of time
 - o Measured in meters per second (m/s)
- Note: When velocity is constant, the average velocity is equal to the instantaneous velocity at any time.

Acceleration

- Average acceleration is the rate of change of velocity with time
 - o Measured in m/s²
 - o $A_{avg} = \Delta V / \Delta t = (V_f - V_i) / (t_f - t_i)$
- Instantaneous Acceleration is the velocity per time
 - o The acceleration at a certain instant of time
 - o Measured in m/s²
- Does not depend on mass

Variations of equations:

$$V_{avg} = \frac{1}{2} (V_i + V_f) \qquad V_f = V_i + at \text{ (when } t_i = 0)$$

$$\Delta X = V_i t + \frac{1}{2} at^2 \qquad X_f = X_i + V_i t + \frac{1}{2} at^2$$

$$V_f^2 = V_i^2 + 2a(X_f - X_i) \leftarrow \text{when don't have time}$$

* Note: When linear equations are vertical, accelerations will always be 9.81 m/s² DOWN

- When an object is thrown vertically upward then its speed on returning to its original starting point is the same as its initial speed.

Vectors

- Any quantity that refers to both a magnitude (number) and a direction
 - Displacement and Velocity are examples of vectors
- In projectile launch problems:

Advancing the STEM Agenda Cindy P. Veenstra, Fernando F. Padró, Julie A. Furst-Bowe, 2012-05-15 In July 2011 the ASQ
 Education Division held its first Advancing the STEM Science Technology Engineering and Mathematics Agenda in Education
 the Workplace and Society Conference at the University of Wisconsin Stout This publication is a selection of papers and
 workshops from this groundbreaking conference The ideas presented here will help other educators and policy makers to
 develop their own innovative high impact ideas for inspiring student interest in STEM careers improving the delivery of
 STEM education at their schools and colleges and helping STEM college graduates transition to the workplace The chapters
 in this book reflect research and best practices integrating the ideas of continuous improvement in combination with a can do
 attitude to provide a valuable resource that will lead others to consider similar innovative and collaborative educational
 structures that will drive more interest in STEM majors in college and provide for our next generation of scientists
 technicians and engineers Prior to reviewing Advancing the STEM Agenda I had a list in my mind of topics that I hoped
 would be addressed I m very pleased with how many are covered and covered well This project succeeds at the challenge of
 providing not only beneficial breadth but also important depth Because our public private partnership has been committed
 explicitly to continuous improvement for more than a decade I couldn t help but notice as the editors also point out in their
 conclusion the extent to which continuous improvement is a common thread throughout the book That speaks to the book s
 practical utility in many settings and on a long term basis No less valuable is the discussion of student motivation by many of
 the authors which STEM teachers in our area have identified as a major issue of interest to them in recent surveys Richard
 Bogovich Executive Director Rochester Area Math Science Partnership Minnesota Veenstra Padr and Furst Bowe provide a
 huge contribution to the field of STEM education We all know the statistics and of the huge need in the area of STEM
 students and education but what has been missing are application and success stories backed by research and modeling The
 editors have successfully contributed to our need by focusing on collaborative models building the K 12 pipeline showing
 what works at the collegiate level connecting across gender issues and illustrating workforce and innovative ideas John J
 Jasinski President Northwest Missouri State University Advancing the STEM Agenda provides a broad set of current
 perspectives that will contribute in many ways to advancing the understanding and enhancement of education in science
