Engineering Design Graphics Journal ,2003 **Manufacturing Decision Support Systems** Hamid R.

Parsaei,Thomas R. Hanley,S.S. Kolli,2012-12-06 During the last two decades a tremendous growth in the popularity and applications of computers in manufacturing has occurred Computer aided design computer aided manufacturing flexible manufacturing systems group technology and many others are considered by many manufacturing executives as the most promising technologies and philosophies that if successfully implemented can reduce costs and enable the US manufacturing companies to become more competitive in the global market In the computer integrated manufacturing environment the decision processes are often more involved The decision makers are frequently required to have access to a vast amount of data to support and analyze their complex decision problems at strategic and tactical levels Decision support systems are often referred to as computer based information technologies that allow the decision makers to interactively communicate and solve the decision problems Manufacturing Decision Support Systems is intended to report the latest developments and address the central issues in this area This volume consists of 14 refereed chapters written by leading researchers from academia and industry **Air Force Journal of Logistics** ,1993 IT Based Manufacturing Surender Kumar,S. K.

Mukherjee,Vinay Sharma,2003 This monograph provides a logistic view of IT Based manufacturing comprising the concept methodology tools techniques and applications Papers written by experts in their fields are organized into different sections covering cutting processes and machine tools non traditional manufacturing joining and forming manufacturing mechatronics and intelligent manufacturing Comprises of 129 papers presented by both Indian and International Scientists at the 20th All India Manufacturing Technology Design and Research Conference Machining Processes and Machine Tools Non Traditional Manufacturing Forming and Joining Manufacturing Mechatronics Intelligent Manufacturing Related Topics

The Design Productivity Debate Alex H.B. Duffy,2012-12-06 Over the past decade with greater emphasis being placed upon shorter lead times better quality products reduced product costs and greater customer satisfaction the topic of Engineering Design has received increased interest from the industrial and academic communities Considerable effort has been directed at developing design process methodologies and building computer tools that focus upon relatively narrow aspects of design but many key problems in Engineering Design research and practice remain unanswered Resulting from the First International Engineering Design Debate held in Glasgow UK in late 1996 this volume discusses the main issues concerning the improvement of design productivity Covering design studies design development concurrent engineering and design knowledge and information it attempts to derive a common understanding of the basic factors problems and potential solutions involved *Knowledge Intensive Computer Aided Design* Susan Finger,Tetsuo Tomiyama,Martti

Mäntylä,2013-03-09 Computer Aided Design CAD technology plays a key role in today s advanced manufacturing environment To reduce the time to market achieve zero defect quality the at first production and use available production

and logistics resources effectively product and design process knowledge covering the whole product life cycle must be used throughout product design Once generated this intensive design knowledge should be made available to later life cycle activities Due to the increasing concern about global environmental issues and rapidly changing economical situation worldwide design must exhibit high performance not only in quality and productivity but also in life cycle issues including extended producer s liability This requires designers and engineers to use various kinds of design knowledge intensively during product design and to generate design information for use in later stages of the product life cycle such as production distribution operation maintenance reclamation and recycling Therefore future CAD systems must incorporate product and design process knowledge which is not explicitly dealt with in the current systems in their design tools and design object models

Journal of Engineering Education ,1996 *Noise Control Engineering Journal* ,1992 *What Every Engineer Should Know about Concurrent Engineering* Thomas A. Salomone,2019-03-13 This work offers a step by step approach to the overall concurrent engineering CE development process presenting both fundamental principles and advanced concepts while focusing on rapid product development and cost effective designs The book also provides an introduction to Cost Driven Design with specific examples on how to minimize expenses by understanding the basis of product costs The process of concurrent engineering is explained from initial planning to production start up
