Operation and Maintenance Manual for Hand Pumps Fred Cammack,1999 , *Dynamic Positioning Systems* Fidaa Karkori,2024-05-18 The application of dynamic positioning DP systems has been expanded significantly not only in the number of DP vessels but also in the range of applications and the advancement of DP technologies In order to address various needs of the industry the majority of leading Classification Societies Class have developed Class specific guidance relating to development implementation and use of dynamic positioning Systems DP This book provides generalised guidance adapted from various leading Classes to provide DP professionals with a readily available source of information and guidance relating to the operation and use of DP systems The book provides optional notations and technical specifics that reflect current industry practice and DP technologies This book includes guidance relating to Enhanced system EHS notations to recognise design features beyond current DPS series notations and to provide flexibility to owners and operators Station keeping performance SKP notations to recognise DP capability and to encourage robust design of the DP systems Increased level of detail on the technical requirements to help less experienced users Data Driven Energy Centered Maintenance Fadi Alshakhshir,Marvin T. Howell,2021-07-19 Over recent years many new technologies have been introduced to drive the digital transformation in the building maintenance industry The current trend in digital evolution involves data driven decision making which opens new opportunities for an energy centered maintenance model Artificial Intelligence and Machine Learning are helping the maintenance team to get to the next level of maintenance intelligence to provide real time early warning of abnormal equipment performance This edition follows the same methodology as the First It provides detailed descriptions of the latest technologies associated with Artificial Intelligence and Machine Learning which enable data driven decision making processes about the equipment s operation and maintenance Technical topics discussed in the book include Different Maintenance Types and The Need for Energy Centered Maintenance The Centered Maintenance Model Energy Centered Maintenance Process Measures of Equipment and Maintenance Efficiency and Effectiveness Data Driven Energy Centered Maintenance Model Digitally Enabled Energy Centered Maintenance Tasks Artificial Intelligence and Machine Learning in Energy Centered Maintenance Model Capabilities and Analytics Rules Building Management System Schematics The book contains a detailed description of the digital transformation process of most of the maintenance inspection tasks as they move away from being manually triggered The book is aimed at building operators as well as those building automation companies who are working continuously to digitalize building operation and maintenance procedures The benefits are reductions in the equipment failure rate improvements in equipment reliability increases in equipment efficiency and extended equipment lifespan **Energy Savings Calculations for Commercial Building Energy Efficiency Upgrades** Anthony J. Buonicore,2024-07-02 Code compliant building materials and equipment will typically have a lower initial cost however the lifetime energy savings of the high efficiency equipment will often justify the upfront cost

premium and result in a more cost effective solution Energy Savings Calculations for Commercial Building Energy Efficiency Upgrades assists energy professionals contractors building owners and managers in developing energy savings estimates that can facilitate a quick assessment of the potential energy savings that might be realized when replacing existing building components with the highest efficiency equipment It also provides algorithms to estimate greenhouse gas emission reductions that may be achieved by building energy efficiency upgrades and the impact these upgrades can have on building electrification decarbonization projects This book Focuses on the development of energy savings estimates based upon a whole building s energy consumption and the energy consumption associated with building end uses such as space heating space cooling ventilation lighting and so forth Includes over 70 illustrative examples using algorithms to demonstrate how energy savings and greenhouse gas emission reductions may be estimated utilizing different strategies and equipment
