You'll discover how to prepare for these new roles and put necessary equipment and arrangements in place before you untie your docklines. This exquisitely detailed guide also helps you master the skills you'll need to handle a boat at sea with a small crew, including weather forecasting, passage planning, watchkeeping, heavy weather sailing, emergency management, midocean repairs. Surveying Fiberglass Sailboats: A Step-by-Step Guide for Buyers and Owners Henry C. Mustin, 1994-01-22. Mustin's part-by-part look at hull, deck, rig, and machinery is both a minicourse for transforming used boat shopping from a game of craps to a science and the first step in a holistic boat maintenance program. His discussion of the significance of cracks found in aging hulls and decks is the most thorough in print. He is not shy in assessing the lack of regulation of professional surveyors, nor does he shrink from pointing a finger at shoddy building practices. Having a used boat surveyed is a critical prelude to buying it. Yet a professional survey is expensive, several hundred dollars. *Surveying Fiberglass Sailboats* will enable you to conduct your own surveys while narrowing the field, then monitor a professional surveyor's performance when selecting your target boat.
