**Chemistry of the Climate System** Detlev Möller, 2014-09-10 Climate change is a major challenge facing the modern world The chemistry of air and its influence on the climate system forms the main focus of this monograph The book presents a problem based approach to presenting global atmospheric processes evaluating the effects of changing air composition as well as possibilities for interference within these processes and indicates ways for solving the problem of climate change through chemistry The new edition includes innovations and latest research results *Calcium-Based Materials* S.S. Nanda, Jitendra Pal Singh, Sanjeev Gautam, Dong Kee Yi, 2024-05-15 Calcium based natural minerals are important for a wide range of applications Though these materials are available in nature researchers are working toward developing them in the laboratory Calcium Based Materials Processing Characterization and Applications introduces the possibility of designing these materials for particular applications Introduces a variety of calcium based materials and discusses synthesis growth and stability Provides in depth coverage of calcium carbonate Discusses applications of calcium based minerals in different fields Includes details on synchrotron X ray tools for case minerals This comprehensive text is aimed at researchers in materials science engineering and bioengineering *Applications of Nuclear and Radioisotope Technology* Khalid Alnabhani, 2021-09-17 Applications of Nuclear and Radioisotope Technology For Peace and Sustainable Development presents the latest technology and research on nuclear energy with a practical focus on a variety of applications Author Dr Khalid Al Nabhani provides a thorough and well rounded view of the status of nuclear power generation in order to promote its benefits towards a sustainable clean and secure future This book offers innovative theoretical analytical methodological and technological approaches encourages a positive societal and political uptake This book enhances awareness of peaceful nuclear applications across a broad spectrum of industries including power generation agriculture and medicine It presents successful examples and lessons learned across many countries that are working towards their sustainability goals in cooperation with the IAEA and AAEA to benefit researchers professionals and decision makers implementing and developing their own nuclear strategies for the future Presents theoretical and scientific knowledge which is supported with real examples and successful experiences Provides prevailing perceptions of nuclear safety and security concerns by presenting the most advanced safety and security systems Applies technologies to a variety of applications to guide the reader to make informed decisions to help meet sustainability goals **The ^A Periodic Table** Eric Scerri, 2019-10-21 The Periodic Table Its Story and Its Significance traces the evolution and development of the periodic table from Mendeleev's 1869 first published table and onto the modern understanding provided by modern physics Biological Crystallization Jaime Gómez Morales, 2019-09-23 For at least six hundred million years life has been a fascinating laboratory of crystallization referred to as biomineralization During this huge lapse of time many organisms from diverse phyla have developed the capability to precipitate various types of minerals exploring distinctive pathways for

building sophisticated structural architectures for different purposes The Darwinian exploration was performed by trial and error but the success in terms of complexity and efficiency is evident Understanding the strategies that those organisms employ for regulating the nucleation growth and assembly of nanocrystals to build these sophisticated devices is an intellectual challenge and a source of inspiration in fields as diverse as materials science nanotechnology and biomedicine However Biological Crystallization is a broader topic that includes biomineralization but also the laboratory crystallization of biological compounds such as macromolecules carbohydrates or lipids and the synthesis and fabrication of biomimetic materials by different routes This Special Issue collects 15 contributions ranging from biological and biomimetic crystallization of calcium carbonate calcium phosphate and silica carbonate self assembled materials to the crystallization of biological macromolecules Special attention has been paid to the fundamental phenomena of crystallization nucleation and growth and the applications of the crystals in biomedicine environment and materials science
