Advanced Deep Learning Strategies for the Analysis of Remote Sensing Images Yakoub Bazi, Edoardo Pasolli, 2021-06-15 The rapid growth of the world population has resulted in an exponential expansion of both urban and agricultural areas Identifying and managing such earthly changes in an automatic way poses a worth addressing challenge in which remote sensing technology can have a fundamental role to answer at least partially such demands The recent advent of cutting edge processing facilities has fostered the adoption of deep learning architectures owing to their generalization capabilities In this respect it seems evident that the pace of deep learning in the remote sensing domain remains somewhat lagging behind that of its computer vision counterpart This is due to the scarce availability of ground truth information in comparison with other computer vision domains In this book we aim at advancing the state of the art in linking deep learning methodologies with remote sensing image processing by collecting 20 contributions from different worldwide scientists and laboratories The book presents a wide range of methodological advancements in the deep learning field that come with different applications in the remote sensing landscape such as wildfire and postdisaster damage detection urban forest mapping vine disease and pavement marking detection desert road mapping road and building outline extraction vehicle and vessel detection water identification and text to image matching AI + The New Human Frontier Erica Orange, 2024-08-08 A critical discussion of AI as a transformative opportunity for humanity AI The New Human Frontier Reimagining the Future of Time Trust Truth by Erica Orange a renowned futurist offers a compelling exploration of generative AI s potential to enhance human creativity rather than replace it This pivotal book navigates how AI tools will help shape the human experience and aid in augmenting human ingenuity and imagination The author eloquently argues that the essence of human intelligence our curiosity critical thinking empathy and more is not only irreplaceable but will become increasingly valuable as AI evolves to take on routine tasks AI the New Human Frontier is a clarion call for embedding trust human oversight and judgement into AI development ensuring that the technology amplifies our most human capabilities At a time when the lines between what is real fake true and false are becoming more blurred reliance on human centric solutions not just technological ones will become more critical Why AI The New Human Frontier is a must read Navigate the Future with Confidence Prepare yourself for the future with groundbreaking perspectives on the relationship between humans and AI Find out how to future proof against the challenges of tomorrow and seize the opportunities presented by technological advancements Understand how to capitalize on the Potential of AI Learn how the next generation of AI tools can expand human creativity and intelligence not diminish it Discover the crucial role of human oversight in creating AI technologies that enhance our capabilities and work alongside us Amplify Your Ability to leverage the human advantage Understand why and how AI s advancement will make human intuition empathy and critical thinking more essential than ever Get insights into how to leverage your most human centric skills in an AI driven world Perfect for business leaders managers executives and professionals navigating the new landscape of

technology AI The New Human Frontier provides not only a vision of the future but also practical advice on thriving in an AI enhanced world Add this book to your library to ensure you re ready for the transformative changes that lie ahead Data Science Applications During COVID-19 Gopee Mukhopadhyay, 2025-01-03 The illustrations in this book are created by Team Educohack AI and Data Science Applications During COVID 19 explores cutting edge research on how artificial intelligence AI and data science have been used to detect mitigate treat and eliminate COVID 19 This comprehensive guide introduces AI and data science techniques used in COVID 19 research considering both past and future pandemics including related Coronavirus variations We cover a wide range of AI applications in COVID 19 research such as robotics machine learning neural networks computer vision expert systems speech recognition evolutionary computation and natural language processing The book also delves into data science applications including image analysis data processing data privacy deep learning medical image processing data protection cybersecurity sorting applications COVID 19 diagnosis geoprocessing and tracking predictive systems design cognition mobile technology and telemedicine solutions Additionally we discuss AI based solutions innovative treatment methods and public safety measures Finally readers will learn about the applications of Big Data and new data models for mitigating the effects of pandemics How Machine Learning is Innovating Today's World Arindam Dey, Sukanta Nayak, Ranjan Kumar, Sachi Nandan Mohanty, 2024-06-18 Provides a comprehensive understanding of the latest advancements and practical applications of machine learning techniques Machine learning ML a branch of artificial intelligence has gained tremendous momentum in recent years revolutionizing the way we analyze data make predictions and solve complex problems As researchers and practitioners in the field the editors of this book recognize the importance of disseminating knowledge and fostering collaboration to further advance this dynamic discipline How Machine Learning is Innovating Today's World is a timely book and presents a diverse collection of 25 chapters that delve into the remarkable ways that ML is transforming various fields and industries It provides a comprehensive understanding of the practical applications of ML techniques The wide range of topics include An analysis of various tokenization techniques and the sequence to sequence model in natural language processing explores the evaluation of English language readability using ML models a detailed study of text analysis for information retrieval through natural language processing the application of reinforcement learning approaches to supply chain management the performance analysis of converting algorithms to source code using natural language processing in Java presents an alternate approach to solving differential equations utilizing artificial neural networks with optimization techniques a comparative study of different techniques of text to SQL query conversion the classification of livestock diseases using ML algorithms ML in image enhancement techniques the efficient leader selection for inter cluster flying ad hoc networks a comprehensive survey of applications powered by GPT 3 and DALL E recommender systems domain of application reviews mood detection emoji generation and classification using tokenization and CNN variations of the exam scheduling problem using graph coloring the intersection of software engineering and

machine learning applications explores ML strategies for indeterminate information systems in complex bipolar neutrosophic environments ML applications in healthcare in battery management systems and the rise of AI generated news videos how to enhance resource management in precision farming through AI based irrigation optimization Audience The book will be extremely useful to professionals post graduate research scholars policymakers corporate managers and anyone with technical interests looking to understand how machine learning and artificial intelligence can benefit their work Recent Advances in Computational Methods in Science and Technology Sukhpreet Kaur, Amanpreet Kaur, Manish Kumar, 2026-01-19 This proceedings compilation emerges from the exchange of research insights and innovative ideas among academicians researchers practitioners and students in the field of computer science This book gathers peer reviewed papers covering the most recent advances in Internet of Things IoT Cloud Computing Machine Learning Networking System Design and Methodologies Big Data Analytics and Applications ICT for Sustainable Environment and Artificial Intelligence It presents cutting edge developments that offer real time support and enhanced security solutions for advanced learners researchers and academicians This comprehensive resource can help promote translation of basic research into applied investigation and convert applied investigation into practice This compilation is expected to be of significant value to a diverse audience including researchers academicians undergraduate and postgraduate students research scholars professionals technologists and entrepreneurs Generative Artificial Intelligence and Ethics: Standards, Guidelines, and Best Practices Gaur, Loveleen, 2024-10-10 The rapid advancement of generative artificial intelligence AI has brought about significant ethical challenges As machines become more adept at creating human like content concerns about misuse bias privacy and accountability have emerged Without clear guidelines and regulations there is a risk of unethical use such as creating deepfake videos or disseminating misinformation which could have severe societal consequences Additionally questions about intellectual property rights and the ownership of AI generated creations still need to be solved further complicating the ethical landscape The book Generative Artificial Intelligence and Ethics Standards Guidelines and Best Practices comprehensively solves these ethical challenges By providing insights into the historical development and key milestones of Generative AI the book lays a foundation for understanding its complex ethical implications. It examines existing ethical frameworks and proposes new ones tailored to AI s unique characteristics helping readers apply traditional ethics to AI development and deployment Advanced Intelligent Computing Technology and Applications De-Shuang Huang, Wei Chen, Yijie Pan, Haiming Chen, 2025-07-14 The 12 volume set CCIS 2564 2575 together with the 28 volume set LNCS LNAI LNBI 15842 15869 constitutes the refereed proceedings of the 21st International Conference on Intelligent Computing ICIC 2025 held in Ningbo China during July 26 29 2025 The 523 papers presented in these proceedings books were carefully reviewed and selected from 4032 submissions This year the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing Its aim was to unify the picture of contemporary
