**An Applied Guide to Process and Plant Design** Sean Moran, 2019-06-12 An Applied Guide to Process and Plant Design 2nd edition is a guide to process plant design for both students and professional engineers. The book covers plant layout and the use of spreadsheet programs and key drawings produced by professional engineers as aids to design subjects that are usually learned on the job rather than in education. You will learn how to produce smarter plant design through the use of computer tools including Excel and AutoCAD. What If Analysis, statistical tools, and Visual Basic for more complex problems. The book also includes a wealth of selection tables covering the key aspects of professional plant design which engineering students and early career engineers tend to find most challenging. Professor Moran draws on over 20 years experience in process design to create an essential foundational book ideal for those who are new to process design compliant with both professional practice and the IChemE degree accreditation guidelines. Includes new and expanded content including illustrative case studies and practical examples. Explains how to deliver a process design that meets both business and safety criteria. Covers plant layout and the use of spreadsheet programs and key drawings as aids to design. Includes a comprehensive set of selection tables covering aspects of professional plant design which early career designers find most challenging.

**The Planning Guide to Piping Design** Richard Beale, Paul Bowers, 2017-10-22 The Planning Guide to Piping Design Second Edition covers the entire process of managing and executing project piping designs from conceptual to mechanical completion, also explaining what roles and responsibilities are required of the piping lead during the process. The book explains proven piping design methods in step by step processes that cover the increasing use of new technologies and software. Extended coverage is provided for the piping lead to manage piping design activities which include supervising, planning, scheduling, evaluating manpower, monitoring progress, and communicating the piping design. With newly revised chapters and the addition of a chapter on CAD software, the book provides the mentorship for piping leads, engineers, and designers to grasp the requirements of piping supervision in the modern age. Provides essential standards, specifications, and checklists and their importance in the initial set up phase of piping project execution. Explains and provides real world examples of key procedures that the piping lead can use to monitor progress. Describes project deliverables for both small and complex size projects. Offers newly revised chapters including a new chapter on CAD software.
